OPNAV INSTRUCTION 5222.1B CHANGE TRANSMITTAL 1

From: Chief of Naval Operations

Subj: ENTERPRISE TASK MANAGEMENT SOLUTION SYSTEM BUSINESS RULES

Encl: (1) Revised Page 1
(2) Revised Page 1-5
(3) Revised Page 6-2
(4) Revised Page 1 of Enclosure (1)

1. Purpose. To transmit new pages 1, 1-5, 6-2 and page 1 of enclosure (1), which removes references to requirement for a late letter to accompany taskers submitted late to OPNAV Task management.

2. Action. Remove pages 1, 1-5, 6-2 and page 1 of Enclosure (1) of the basic instruction and insert enclosures (1) through (2), respectively.

3. Records Management

a. Records created as a result of this change transmittal, regardless of format or media, must be maintained and dispositioned per the records disposition schedules located on the Department of the Navy Directorate for Administration, Logistics, and Operations, Directives and Records Management Division portal page at <https://portal.secnav.navy.mil/orgs/DUSNM/DONAA/DRM/Records-and-Information-Management/Approved%20Record%20Schedules/Forms/AllItems.aspx>.

b. For questions concerning the management of records related to this change transmittal or the records disposition schedules, please contact the local records manager or the OPNAV Records Management Program (DNS-16).

OPNAV INSTRUCTION 5521.1B

From: Chief of Naval Operations

Subj: ENTERPRISE TASK MANAGEMENT SOLUTION SYSTEM BUSINESS RULES

Ref: (a) CNO WASHINGTON DC R 012157Z Feb 22 (NAVADMIN 022/22)
(b) SECNAV M-5216.5 of June 2015
(c) SECNAV M-5210.2 of August 2018
(d) SECNAV memo of 3 May 2022, Department of the Navy Secretariat (Business Rules) for the Enterprise Task Management Software Solution (ETMS2)
(e) OSD memo of 14 Sep 2017 (Approval Authority to Request Extensions and Other Changes to Assigned Actions)
(f) SECNAV M-5210.1 of September 2019
(g) DODI 5400.04 of March 2009
(h) DODI 5110.04 of June 2022
(i) DoDM 5200.01, DoD Information Security Program of 24 February 2012

Encl: (1) ETMS2 Approval Route Examples
(2) Tasker Timelines

1. Purpose. Per reference (a), Enterprise Task Management Solution System (ETMS2) is the authoritative correspondence and task management system for the Department of the Navy and provides general guidance for consistent usage. Any packages routed to Director, Navy Staff (DNS), Vice Chief of Naval Operations (VCNO), Chief of Naval Operations (CNO) and Secretary of the Navy (SECNAV) will be entered and tracked in ETMS2. All correspondence must be formatted and submitted per references (b) through (i) and as detailed in this instruction.

2. Cancellation. OPNAVINST 5222.1A.

3. Scope and Applicability. This instruction applies to all Navy commands utilizing ETMS2 and all Department of the Navy (DON) congressional team members who submit approved responses to Congress or Congressional staff members via DON Program Information Center (DONPIC).

4. Responsibilities

a. Director, Administration and Operations, Navy Staff (DNS 1). DNS 1 will provide oversight and management of all ETMS2 taskers within OPNAV to include:

1 Mar 2024

- (1) Internal official tasking and routing.
- (2) External official tasking from higher authority including SECNAV, congressional inquiries, Department of Defense (DoD), Joint Chiefs and other higher authority tasking.
- (3) Assigning Office of Primary Responsibility (OPR) for responding to official internal and external tasks within specified suspense dates.
- (4) Electronic routing of official correspondence, directive and documents.
- (5) DONPIC (is the central office for assignments and processing of all incoming informal congressional tasking to the DON on behalf of SECNAV).

Note: SECNAV Congressional Liaison Office receives, assigns and handles formal congressional correspondence items.

b. Army Enterprise Service Desk (AESD). AESD is responsible for ETMS2 technical support, system sustainment, maintenance, process improvement, system configurations and user training.

c. Deputy Chief of Naval Operations, Commanding Officers, Officers in Charge. Responsible for completing and submitting assigned tasks in a timely manner.

d. Executive Assistant (EA), Deputy Executive Assistant (DEA), Flag Secretary (FS) and Division Supervisors will:

- (1) Ensure compliance of this directive within their departments.
- (2) Ensure responses are properly formatted and answered at the appropriate level.
- (3) Ensure a primary and secondary ETMS2 Task Manager are assigned within their divisions, branches or commands.

e. Organization Task Manager. Each team within ETMS2 is required to have a Task Manager assigned as the point of contact for their organization's tasking. Task Managers will:

- (1) Ensure tasks complete by suspense date or request extensions as required.
- (2) Manage users and teams within their organization. Conduct audits to maximize availability of licenses. OPNAV teams and subordinate teams within the directorate start with "OPNAV" in the team name. For example, OPNAV N1 Front Office, OPNAV N13, OPNAV N3N5 FRONT OFFICE, OPNAV N31, etc. Echelon 2 and tenant commands use the same naming convention rules. This allows Task Managers to run reports and easily gather task

1 Mar 2024

analytics for their teams and prevent users from inadvertently tasking the wrong organization with a similar team name.

(3) Contact the AESD support staff and initiate “trouble tickets” to ensure updates and changes are made as required for team and organization hierarchy.

(4) Conduct or provide training resources as required for their users.

f. AO will:

(1) Ensure taskers are accepted or rejected in a timely manner, but no later than 3 business days after assignment.

(2) Ensure suspense dates are correct (reject if blatantly erroneous [i.e. year due is previous year] or accept and request extension immediately).

(3) Ensure the task and expected deliverable(s) are understood. If unclear or ambiguous, seek clarification as soon as possible from the tasking organization. Points of contact are provided in the tasker instructions.

(4) Ensure proper and adequate coordination.

(5) Ensure that tasking is properly accepted or delegated.

5. Records Management

a. Records created as a result of this instruction, regardless of format or media, must be maintained and dispositioned per the records disposition schedules located on the Department of the Navy Directorate for Administration, Logistics and Operations, Directives and Records Management Division portal page at

<https://portal.secnav.navy.mil/orgs/DUSNM/DONAA/DRM/Records-and-Information-Management/Approved%20Record%20Schedules/Forms/AllItems.aspx>.

b. For questions concerning the management of records related to this instruction or the records disposition schedules, contact the local records manager or the OPNAV Records Management Program (DNS-16).

6. Forms. Referenced OPNAV forms can be downloaded from Naval Forms Online at <https://navalforms.documentservices.dla.mil>.

1 Mar 2024

7. Review and Effective Date. Per OPNAVINST 5215.17A, DNS-1A will review this instruction annually around the anniversary of its issuance date to ensure applicability, currency and consistency with Federal, Department of Defense, SECNAV and Navy policy and statutory authority using OPNAV 5215/40 Review of Instruction. This instruction is in effect for 10 years, unless revised or cancelled in the interim. It will be reissued by the 10-year anniversary date if it is still required, unless it meets one of the exceptions in OPNAVINST 5215.17A, paragraph 9. If the instruction is no longer required, it will be processed for cancellation as soon as the need for cancellation is known following the guidance in OPNAV Manual 5215.1 of May 2016.

2. Directives Taskers	5-2
3. Gift Acceptance Packages	5-2
4. Organization Change Requests	5-2

CHAPTER 6 – ETMS2 BEST PRACTICES

1. Senior Leadership Approval Process (SLAP)	6-1
2. Templates	6-1
3. Tasker Notes	6-1
4. Error Reporting	6-2
5. Custom Views	6-2
6. Communication	6-2

CHAPTER 1
GENERAL TASKER INFORMATION

1. General Guidance. At all levels, offices and personnel must convey and carry out CNO's expectation to provide timely, accurate and thorough responses with the appropriate level of coordination. All primary and special staff offices within OPNAV will establish practices and policies that align and reinforce this guidance. Once formally tasked by SECNAV, OPNAV has the responsibility to meet the original suspense date and has 1 business day to accept or reject the task as required by SECNAV Business Rules (reference c). Within OPNAV, ETMS2 teams must accept or reject a task within 3 business days. Failure to accept or reject within 3 business days will be treated as an automatic acceptance.

2. Types of Taskers. All branches within the Department of Defense use compatible Enterprise Tasking tools, which increase cross-service coordination and responses. OPNAV classifies tasking types into these categories:

a. Congressional. Congressional tasking is further broken down into two categories. See Chapter 3 for how to process congressional tasking.

(1) Formal SECNAV Correspondence.

(2) Informal DONPIC Correspondence Tasking (RFI, RFB, etc.).

b. Routine.

c. Other Special Taskers.

(1) Directives Tasking. Directives taskers require additional processing considerations for public release as well as formatting regulations. See Chapter 4 on routing and processing Directives taskers from DNS-15.

(2) Awards Tasking. Award nominations and requests are handled like general tasking until they are sent to nomination boards and routed for approval by senior leadership. See Chapter 4 on routing and processing Awards nominations.

(3) Gift Acceptance.

3. Tasking Authority

a. Only the Offices of SECNAV, Office of the Under Secretary of the Navy (UNSECNAV), Office of the Chairman, Joint Chief of Staff (Joint Staff), Assistant Secretary of the Navy (ASN) offices and their immediate offices have the authority to directly task OPNAV. All tasking and coordination requiring formal written response from OPNAV that originates from SECNAV or UNSECNAV is sent to OPNAV TASK MANAGEMENT (DNS FRONT OFFICE) to delegate

1 Mar 2024

to the appropriate OPR or Office of Coordinating Responsibility (OCR). Tasking originating from Joint Staff will be directed to Navy Joint Action Control Officer (JACO) for delegation.

b. Office of Legislative Affairs (OLA) and tasking from Navy Appropriations Matters (FMBE) is tasked through OPNAV and ASN by DONPIC as stated in this instruction's roles and responsibilities. Congressional tasking is outlined in Chapter 3. Refer to these rules for all Congressional matters.

c. Tasking to OPNAV Principal Officials.

(1) All SECNAV, UNSECNAV and Legislative Affairs taskers are coordinated through DNS-1 identified in ETMS2 as "OPNAV Task Management (DNS Front Office)" or "OPNAV DNS Congressionals (DONPIC)." DNS Task Managers will evaluate the tasking and delegate appropriately. Tasking originating from Office of Legislative Affairs (OLA), Navy Appropriations Matters Office (FMBE) and SECNAV Congressional Liaison Officer (CLO) will be sent to "OPNAV DNS Congressionals (DONPIC)."

Note: Any office may utilize "Manage Assignments" and assign coordinating offices as "OCR" for supporting information to the draft, coordination or review of products. When assigning an OCR, utilize the OCR instructions to modify and clearly state what is required by the OCR office.

(2) OPNAV Task Management and OPNAV DNS Congressionals (DONPIC) will task to the echelon ECH 1 and 2 single digit code front offices who are responsible for delegation within their organization to the appropriate leads and subject matter experts.

d. Tasking from Office of the Secretary of Defense (OSD). All tasks from OSD are delegated in ETMS2 by SECNAV Admin. Both OSD and Joint Staff utilize the Correspondence and Task Management System (CATMS), which is directly connected to DON ETMS2 by an approved external link. OPNAV offices tasked directly by OSD via email should inform their N-Code front office immediately and forward the task to the Director, SECNAV Admin, (703) 695-3923, (secnavexecutiveo.fct@us.navy.mil) and courtesy copy (cc) the DNS Tasking Team (dnstaskingteam@us.navy.mil). Responses to tasks affecting both the Navy and Marine Corps should be coordinated with appropriate Headquarters Marine Corps counterparts via ETMS2. Contact information for a team is available on the team profile page within ETMS2. For responses requiring coordination from both CNO and Commandant of the Marine Corps (CMC) and when CMC is the assigned OPR, OPNAV organizations will route Navy responses through their chain of command first prior to providing completed response to USMC for signature. For tasks where USMC and USN are both assigned as OCR, SECNAV or ASN will consolidate Navy and Marine Corps input into a coordinated DON response. For "Dual Tasked" actions, i.e. taskers on the same topic that are assigned by OSD to both SECNAV and OPNAV (via the Joint Staff), OPNAV will respond through SECNAV per agreement between SECNAV and the Joint Staff.

1 Mar 2024

e. Joint Staff Tasking. All tasks from the Joint Staff are delegated in ETMS2 by the Navy JACO. OPNAV offices tasked directly by Joint Staff via email or ETMS2 should inform their N-Code front office immediately and forward the task to the Navy JACO, (703) 692-8188. If received in ETMS2, reject the task and recommend reassignment to "OPNAV N36 JACO." Use caution when providing information to Joint Staff counterparts, as informal input may be construed as official Navy policy or position.

f. Tasking to delegate organizations as OPR or OCR should be made to that organization's FRONT OFFICE [unless otherwise outlined in Chapter 3 for DONPIC tasking (see Chapter 3)].

4. Tasker Management

a. ETMS2 Tasker Roles and Terms.

(1) Initiator. The User or Team that created or originated the tasker in the system on behalf of an outside entity or themselves.

(2) Primary Office of Primary Responsibility (Primary OPR). User or Team designated as the lead for the task by the Initiator. This Team or User is overall responsible for review and completion of tasks sent from the Initiator.

(3) OPR. The User or Team assigned by the Primary OPR to prepare the proposed tasker response for the Primary OPR review. This Team or User is required to consolidate any information collected from coordinating offices and to provide the package or product required by the task. OPRs are responsible for the final product and its approval.

(4) OCR. The User or Team tasked to provide input to the OPR for consideration. OCR is expected to actively provide support and input to OPR or Primary OPR as required.

(5) Office of Primary Responsibility – Coordinating (OPR-C). Subordinate User or Team assigned by an OCR to lead and prepare the OCR response for review by the parent OCR.

(6) Office of Coordinating Responsibility – Coordinating (OCR-C). Subordinate assigned by an OCR to provide collateral input to the OPR-C.

(7) Courtesy Copy. Information only copy. No action required.

(8) Team. A group of users authorized to respond on behalf of a designated organization. Teams represent commands, departments, divisions or Approving Officials.

(9) Parent Team. Organizational team to which ETMS2 users are assigned. Users assigned to a Parent Team act on behalf of the team to act on Approval Route actions.

(10) Guest User. Users assigned to a Parent Team can also be assigned as a Guest User to any other Team. Guest users have all the rights of the "Parent Team" and can accept, reject or complete a task and concur or non-concur on an approval route.

(11) Document Library. The Document Library within a tasker is linked from the tasker SharePoint site. Within the Document Library are three folders: Original Documents, Supporting Documents and Final Documents. Only the Initiator has 'write' permissions to the Original Document folder. The Initiator, OPR and OCRs have 'write' permissions to the Supporting Document folder. The Initiator and OPR have 'write' permissions to Final Documents folder.

b. Tasker Views.

(1) ETMS2 offers individual customizable views that enable the user to see information that is beneficial and helpful in the day-to-day management of taskers. Several system views exist that increase the daily productivity and either must be used or customized to ensure workflow continues to move fluidly.

(a) "Active In Box – Me/My Teams."

(b) "Awaiting Response – My/My Team/Teams I Manage."

(c) "Active – Taskers (My/My Teams/Teams I Manage)."

(2) For users on multiple teams with many taskers, use the "Advanced Find" feature or "filter" button to customize the display. Visit MilSuite for step-by-step guides on building custom views (<https://www.milsuite.mil/book/groups/etms2support/projects/471-how-to-guides>).

(3) Each team assigned to a tasker has a unique copy of that tasker within ETMS2. See Chapter 2 subparagraph 1v for more information regarding tasker copies.

c. ETMS2 Dashboards.

(1) The use of Dashboards within ETMS2 allows users to see multiple views and customize the information displayed on one screen (Figure 1.1). Dashboards can be set to be a user's default home screen when logging into the system under user preferences.

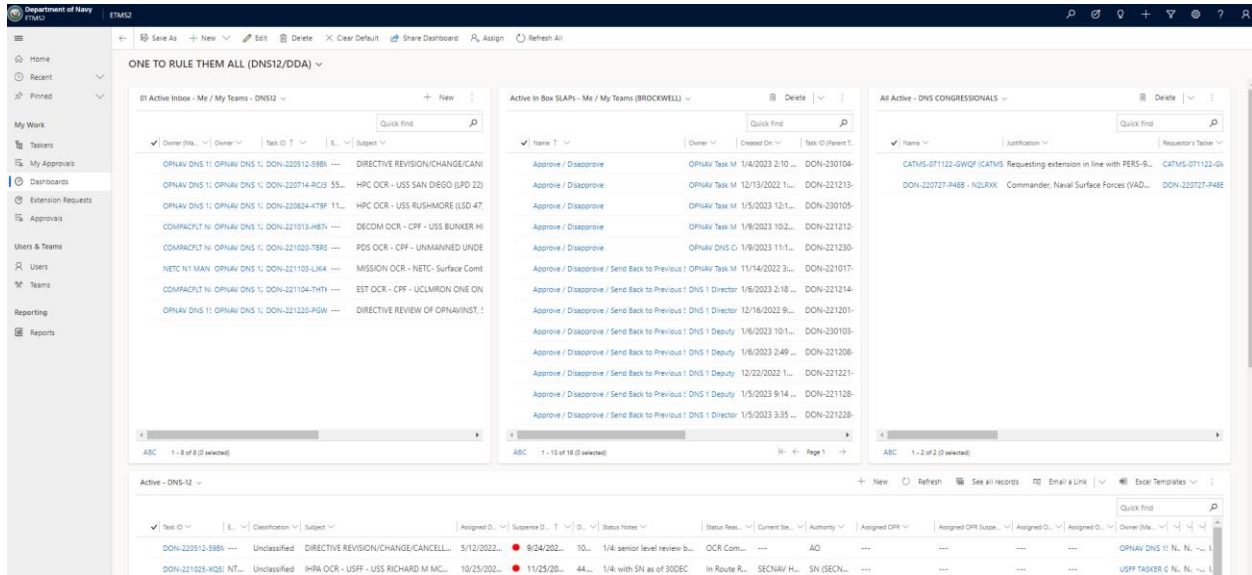

Figure 1.1

d. My Approvals. In addition to tasker views, the “My Approval” queue is often used for routing or coordination. This section of ETMS2 must be checked once per day by each user or team. See Chapter 3 for congressional approval routing and Chapter 4 for routine taskers approval routing.

e. DNS 1 uses a Standard Operating Procedure to escalate visibility through the DNS organization when a task is overdue. Task Managers should use “Tasker Notes” to keep DNS apprised of current issues or status with taskers assigned. For all taskers that are overdue when submitted to OPNAV Task Management for DNS signature, justification statements detailing the reasons for tasker submission after the suspense date must be included in the “My Response” section of the tasker. “Administrative oversight” will not be accepted as a valid justification for tardiness.

4. Tasker Delegation

a. To assign teams to a task, click the “Manage Assignment” action button. In the search field that states “select users and teams for assignment,” type the name of the team to be added or click the magnifying glass and search within the popup window (Figure 1.2).

Manage Assignments
Use this dialog to manage the Tasker's assignments. Add assignments using the assignment lookup field(s) below. You can further customize the assignments by editing their instructions and/or suspense dates using the appropriate fields below.

Current Tasker | **Assignments** | OPR Details & OCR Details

Select users and teams for assignment [Search Icon] [Cancel] [Send]

☐ Owner ☐ OPNAV N7 FRONT OFFICE

Accept Only: ☐ E-mail docs to new External Parties: ☒

Status: In OCR [Dropdown]

Unique Suspense Date: [Date Picker]

Figure 1.2

b. Select OPR, then click “OPR Details and OCR Details” to add clear instructions to the new assignees of the task. From this menu, set a specific date for the assigned OPR or OCR, and type unique instructions for both (if OPR and OCR are both assigned).

c. If multiple OCRs are assigned requiring different dates, adjust each OCR assignee in the main “Assignments” tab by selecting “unique suspense date.”

d. When instructions and assignees are added, click “Send” to send the assignment to the teams selected.

e. When updating tasker instructions or changing suspense dates, edits are made from the “Manage Assignments” window and resent to assignees. This generates an email notification that the tasker has been modified and reflects on the assignees’ tasker copies. See Chapter 2, paragraph 1v for more information regarding tasker copies. Annotate the changes in “My Instructions” with, “**UPDATE:**” to quickly draw attention to the changes of the task.

5. Tasker Routing

a. When routing a tasker to a new organization for review and approval, utilize “Manage Assignments” and select that organization as OPR (Note: system defaults to OCR. Users must select OPR). This allows the receiving organization to edit and move documents to appropriate folders for leadership to review, sign or endorse. Use this method of routing throughout the DON for delegations and approvals to other organizations.

b. Electronic approvals (via “Submit for Approval”) should be used when routing a tasker for senior leadership approval. All personnel in the routing chain of the submitting organization will have identical document library permissions to the organization that activated the approval route.

c. Senior Leaders who have completed Senior Leadership Approval Process (SLAP) training are defaulted to the “My Approvals” screen in ETMS2. The entire approval route and previous approvers’ notes are available to each active stage in the route. The “My Response” section provides the senior leader with the information they require to take action or review and

endorse the documentation provided in the document library. “My Response” section should mirror the content of an Action Memo (detailed in ref (b)) and is designed to replace the Action Memo. The Final Documents library is also the default library presented to senior leadership from the “My Approvals” screen. See Chapter 4 paragraphs 6 and 8 for more details regarding SLAP.

CHAPTER 2 ETMS2 TASKER FIELDS

1. Tasker Details

a. Task ID – Task ID is displayed in a green (NIPR) or blue (SIPR) banner across the top of the tasker window. A unique identifying number is assigned to each task in ETMS2. Figure 2.1 displays “DON-220516-LQZH” as the unique ETMS2 task number. Taskers created in the DON environment always start with “DON” on NIPR and SIPR. Taskers created in other enterprise environments may begin with a different prefix. The second set of digits in the task number represent the date the task was created using YYMMDD format.

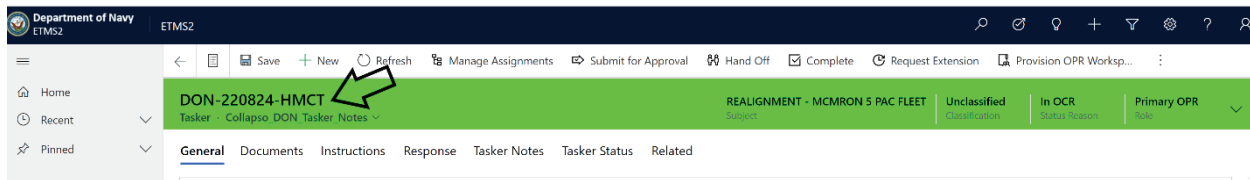

Figure 2.1: “Tasker ID”

b. Subject – Tasker subject lines are required to use appropriate naming conventions outlined in Chapter 3 for Congressional taskers and Chapter 4 for Routine taskers.

c. Suspense Date – Task initiators should ensure that suspense dates are realistic and feasible. Consider required routing to final approval authority and calculate the time required to complete all steps. Once a task is completed by the OPR and transitions to OPNAV Task Management, all tasks that require approval or review by, senior leaders (DNS, VCNO, CNO, ASNs, UNSECNAV, SECNAV) require substantial lead time. Therefore, Task Managers should ensure that the minimum time for final review and approval of Senior Leader(s) is factored into the suspense date at task initiation. If substantive administrative error correction or content clarification is required for a tasker, it may be sent back to the OPR for rework. Taskers that require no additional work during routing can be expected to follow the guidelines identified in subparagraphs 1c(1) through 1c(4) for approval:

- (1) 10 Business days for DNS for approval
- (2) 15 Business days for VCNO approval
- (3) 20 Business days for CNO approval
- (4) 30 Business days for an ASN, UNSECNAV or SECNAV approval

1 Mar 2024

d. Warning Threshold – This field (annotated in hours) shifts the green “stoplight” status to yellow when this threshold is met. After the suspense date, the “stoplight” will change to red. Warning Threshold serves as a visual aid for Task Managers, allowing users to see upcoming due dates and overdue taskers.

e. External Tasker ID – This field is blank when the task is initiated by the Navy. Tasks initiated outside the DON by an external agency will reflect the tasking organization’s Team ID from CATMS in this field. When created in the DON environment this field is used by task initiators to reference shared drive catalogues, other ETMS2 taskers or archived DON TRACKER numbers.

f. Origin – OSD is the system default selection. For tasks originating within the Navy, select Navy. If entering a tasker from an outside organization without an approved External Task System connection, alter this field to identify the organization who originated the task (such as OSD or JOINT STAFF).

g. Owner – This displays the current team “view” being accessed. When opening a task after using the search bar, this will always default to the Initiator view. Click the “Tasker Status” tab and click another team to see the alternative team view selected. Action buttons at the top vary based upon the team view (tasker copy) selected. Viewers must ensure access to the correct tasker copy to complete required actions.

h. Standard Subject Identification Code (SSIC) –The standard system of categorizing departmental documentary material. SSICs specify filing and record maintenance procedures for the Navy. Refer to reference (c) for a detailed listing of applicable SSICs.

i. Status Notes – This is a free text field that allows teams to quickly tag a status to their tasker and display this in tasker views. Best practice is to display the most recent status of a tasker here and follow up with a “Tasker Note” within the task as well. This field is unique to each tasker copy.

j. Classification – Select the appropriate classification for the tasker. NIPR tasker options include: UNCLASSIFIED, UNCLASSIFIED CUI, UNCLASSIFIED PERSONALLY IDENTIFIABLE INFORMATION (PII) and SIPR ACTION TRACKER. If selecting CUI or PII, ensure the Private box (detailed in subparagraph 4o) is checked. When selecting any classification level other than Unclassified, the banner displaying the tasker number and subject will change to blue.

(1) SECRET Classification. Correspondence classified as SECRET will be processed on DON SIPR ETMS2. A NIPR UNCLASSIFIED version is recommended but not required using SIPR Action Tracker as the classification. Actions in the DON NIPR environment do not automatically reflect in SIPR and actions must be annotated in each or used as only a placeholder reminder in the NIPR environment. Do NOT upload documents or work to the NIPR SIPR

1 Mar 2024

Action Tracker task that would endanger national security. The SIPR Action Tracker is used for tasker management ONLY. The DON SIPR ETMS2 web address is <https://don.etms2.army.smil.mil>.

(2) Higher than SECRET. Correspondence classified higher than SECRET will be processed via a designated office authorized to handle such items. Typically, the Special Security Office or Deputy Under Secretary of the Navy office provides the Joint Worldwide Intelligence Communication System (JWICS) access for appropriate action. Individuals dealing with tasks at this level should ensure they have JWICS access ahead of time. Special Access Programs packages will be coordinated between the originating office and the SECNAV Senior Military Assistant or Chief of Staff. Both OSD and Joint Staff create SIPR ETMS2 taskers as placeholders. Initiators also have the option to create a NIPR task with classification as “JWICS Action Tracker.”

k. Private. Tasks that include PII, such as full SSN, date of birth and medical information require special handling and precautions (medical records, awards, et al) must be marked with the appropriate classification level (Unclassified PII) and use a depersonalized subject line. These tasks and tasks containing business sensitive or proprietary information should be marked “PRIVATE” to protect data contained within the tasker that is sensitive but not classified (leadership may mark taskers as “private” to protect sensitive but not classified notations). ETMS2 is authorized to handle all types of UNCLASSIFIED information up to CUI. Taskers should be marked private if specific handling and distribution restrictions apply. Refer to Admin Manual article 103, Code of Federal Regulations 2018 Title 32, Vol 6, 2002.1 or contact DNS-36 for additional guidance.

Note: It is every user’s responsibility to ensure the correct handling of PII or CUI information. Anyone can update or change the classification of a tasker by clicking the three vertical dots icon then selecting “Change Privacy/Classification” then selecting the new classification and privacy box if required. See Figure 2.2 and 2.3.

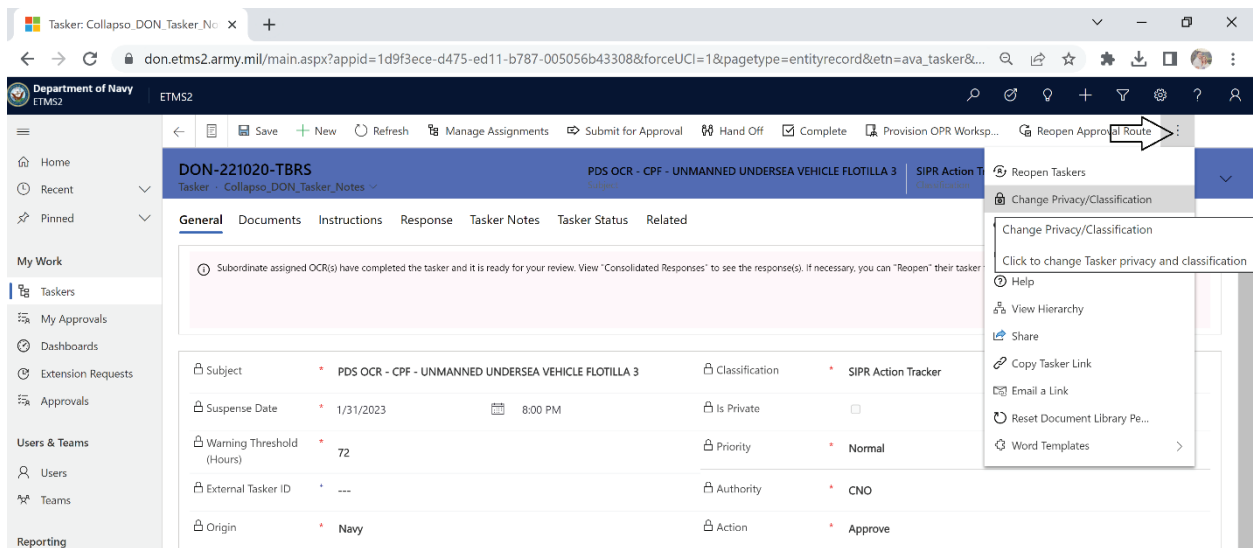

Figure 2.2: Change tasker classification or privacy

Figure 2.3: Select new classification or mark private

1. Priority. This field indicates the urgency and approval level of a task.

(1) Normal. Assigned to all actions tasked as Direct Reply from SECNAV CMD and for all CNO, VCNO, CMC, Assistant Commandant of the Marine Corps (ACMC) or Secretariat ASN or Special Assistants Info items.

(2) High. Assigned to all actions to SECNAV or UNSECNAV for “Info” and all “Signature” or “Approval” items for SECNAV, UNSECNAV, ASN or Special Assistants, CNO, VCNO, DNS, CMC, ACMC or DMCS.

1 Mar 2024

(3) Very High. Assigned to all actions requiring SECNAV or UNSECNAV Signature or Approval as well as all actions (Sign, Approve or Info) to higher levels of DoD or civilian leadership.

(4) Critical. A package assigned a priority of Critical requires immediate senior leader attention. Additionally, the use of “HOT” as an identifier will be used when the issue affects the immediate safety and security of personnel, is required for ongoing contingencies, war efforts OR when the Secretary of Defense (SecDef), Deputy SecDef (DepSecDef), SECNAV, UNSECNAV or Chief of Staff have asked for an immediate response. For tasks initiated by an ASN, Special Assistant, DNS and DMCS organizations, they may provide justification for a HOT package in the “My Instruction” section of their task. The justification will explain the rationale for completion or approval by a specific date or time. Communication is crucial to assure timely processing of a HOT package. A package is not HOT simply because it is late meeting a suspense.

m. Authority. Select the highest Authority that ultimately takes action on the tasker. For example, if SECNAV will be approving, signing or forwarding information or documents, ensure SECNAV is selected as the Authority. If CNO, select CNO, etc. Accurate selection of the Authority is imperative for proper tracking and execution of approval route.

n. Action. This field identifies required actions or deliverables to complete the task.

(1) Sign. Used whenever a signature is required on any document (letter, memorandum, report, certificate, coordination sheet, etc.).

(2) Approve. Used when a decision is required but not a signature.

(3) Coordinate. Used when seeking concurrence or non-concurrence from an organization. Comments and recommendations may be solicited.

(4) Info Only. No action required. May be used for disseminating signed or approved memorandums, letters or other correspondence.

(5) Direct Reply. No CNO, VCNO or SECNAV action is required. The OPR responds directly to the writer without approval or signature of a higher echelon. The OPR determines the level of response within the organization but should be of at least equal rank or organizational level as the writer of the incoming correspondence, if applicable and appropriate. When the action has been tasked by DNS, an electronic copy of the reply will be loaded into ETMS2 Final Documents folder. The OPR is responsible for retaining a copy of all direct reply responses per SECNAVINST 5210.8F, DON Records Management Program and reference (f). If the OPR determines higher headquarters response is more appropriate, process accordingly through the

1 Mar 2024

OPNAV Task Management (DNS Front Office). Direct Reply responses should begin with a reference to the constituent's correspondence and who the response is "on behalf of."

(6) Direct Reply (Email). Same as Direct Reply but the response can be completed through email correspondence.

(7) Appropriate Action. DNS action or action listed in subparagraphs 8r(1) through 8r(5) is NOT required. Completion of the task is at the discretion of the OPR. May be used for disseminating signed or approved memorandums, letters or other correspondence that may have implied tasks to the recipients.

(8) Draft Reply. Used when a draft reply is required from the OPR for the SECNAV. Under SECNAV, CNO or VCNO.

(9) Guidance. Used for disseminating information used for guidance.

(10) Action Officer Coordination. Tasker is for action officer tracking, coordination or inter-office coordination only.

(11) Legal Coordination. Used whenever a legal review and comments are required.

(12) Other. Describe the action required in the instructions.

(13) None. Used when there is absolutely no action required by leadership.

(14) Decision. Used to annotate taskers that involve packages for leadership decision making.

o. Category. This drop-down assignment should correspond with the SSIC selected and is a broader explanation or category identifying the type of tasker.

p. Subcategory. When the category of "CONGRESSIONAL" is chosen, a subcategory box drop down is available to further categorize the tasker type. See Chapter 3 for information regarding Congressionals.

q. Online Help. The Help function in ETMS2 (marked by a "?" icon) will link users to MilSuite.mil and access to User Guides, User Tips and training aides. The DON Reference Material tab within the system contains SECNAV and OSD Writing Guides and sample documents or templates. Make full use of them. All other issues with the system should be addressed by accessing the AESD Portal at <https://snpro.aesdw.army.mil/sp?id=index> and placing a trouble ticket. The Secretary of the Army is the Executive Agent for ETMS2.

1 Mar 2024

r. Document Library. When a task is created, a unique SharePoint site and Document Library is created for tasker work and coordination. There are three Document Libraries in each ETMS2 task: Original Documents, Supporting Documents and Final Documents. Subparagraphs 1r(1) through 1r(4) describe rules that apply to these libraries.

(1) Original Document Library. This library is used for any documents originating from the tasking organization. It may include background information, correspondence that generated the task, specific formats and documents that require review. Original documents can only be edited by the Initiator. All other roles have 'read only' access to these documents.

(2) Supporting Document Library. This is a working library where OCRs upload and save their responses and documents. OPRs should also use this library to consolidate their deliverables to leadership. Supporting documents can be edited by the Initiator, P-OPR, OPR, OCR, OPR-C and the OCR-C. Organizations copied for information purposes have 'read only' access to these documents. OPRs should create a folder for working documents that exists within this library prior to submission to leadership review and submission. Folder creation is available via the Document Library SharePoint ("Open in SharePoint").

(3) Final Documents Library. This library facilitates Navy coordination and electronic records management. OPRs will only place documents referenced in the "My Response" section in this library. Documents that require signature or approval will be free of open comments, track changes, line numbers and draft labels or watermarks. OPRs will mark classified documents with declassification instructions. Additionally, this library will store a completed record of the task that includes signed and approved deliverables. Final Documents can be edited by the Initiator, P-OPR and OPR. All others have 'read only' access to these documents.

s. Instructions. A default template is provided in the "My Instructions" field and in the "My Response" field for new ETMS2 tasks. The template is provided to guide the task Initiator with information that is necessary for action teams and users to provide a complete package. Failure to provide detailed instructions may delay a response, cause confusion and hurt the Navy's reputation. In dealing with congressional taskers, delayed or insufficient responses can adversely affect congressional support and resources for Navy programs and priorities. See Chapter 3 for information regarding Congressionals.

t. My Response. OPRs draft the final response and OCRs provide collateral input for the OPR. Use format provided in Chapter 3 for Congressional Response and Chapter 4 for Routine Tasker responses. The My Response section provides the framework for a decision to be made but in most cases is not the decision document. If a section is not required, use "N/A."

u. Tasker Notes. This section is a free text, running log entry for task comments and statuses to be entered and tracked. It is visible to all users who access the task in any team view. Use this for historical tasker management and tracking of correspondence sent. In this area, ensure that notes reflect any deviations in routing, reasons for extended hold that may result in

the task being late, any communications done outside of the system via email or direct liaison and detailed reasons for rejection of a task. Notes must be used to tell the history and the narrative of a task so that others can quickly understand what has happened during routing. This is the first place that users will look to answer the “why” questions when reviewing a tasks history. This should NOT replace “My Response” section provided to organizations.

v. Tasker Status. The Tasker Status section is a detailed summary of recent actions and current standing. This section has its own action buttons and allows for emailing teams, viewing consolidated responses, viewing consolidated instructions, as well as reopening and cancelling of taskers. Selection of a different team name (then highlighted in blue) will show different tasker copies or views and different action buttons are available or unavailable based on the tasker view selected.

CHAPTER 3 CONGRESSIONAL TASKERS

1. Congressional Tasking Overview. Congressional Tasking to the Navy originates in one of four organizations: OLA, FMBE, OSD or SECNAV. Congressional tasking to the DON from Navy OLA (except Constituent Inquiries (CI), delegated to OPNAV Task Management) and FMBE is delegated to Department of the Navy Program Information Center (DONPIC). DNS-17 is dual hatted as DONPIC and as OPNAV Congressionals under DNS-1. DONPIC is authorized to task all Navy organizations to respond to members of Congress, Congressional committees and their staffs via OLA and FMBE on behalf of the Secretary and acts as a central tasking authority for Congressional correspondence to the committees and professional staff members. National Defense Authorization Act requirements and other Congressional Reporting Requirements are received and tasked by SECNAV Congressionals to Navy (DNS) and Marine Corps (DMCS). The formality of the Congressional task dictates where the tasker is assigned within the DON. Informal requests and tasks are delegated by DONPIC while Formal Correspondence is delegated by SECNAV Congressionals.

2. Informal Congressional Requests and Inquiries

a. Roles and Responsibilities.

(1) Navy OLA is responsible for coordinating and processing all Navy legislative proposals and facilitates communication among Navy leadership, Members of Congress and their staffs. OLA staff works closely with authorizing and oversight committees of the House and Senate, as well as with individual members who have an interest in the DON or sea service issues.

(2) FMBE staff members work closely with House and Senate appropriations committee members, as well their professional and personal staffs on matters related to the budget. FMBE provides advice to SECNAV, CNO and other Navy leaders on budget messaging and strategic alignment, as well as interacting with and responding to Members of Congress. It also provides recommendations regarding effective and efficient allocation of resources, consistent with national security priorities.

(3) DONPIC is responsible for official Navy answers across the DON for Requests for Information (RFI), Requests for Brief (RFB), Questions and Inserts for the Record (QFR and IFR), coordination and clearance of Hearing Statements (HS), annual Fact Sheets (FS) and Program Briefs. QFR, IFR and HS products go through additional review by OSD and Office of Management and Budget (OMB), therefore complying with suspense dates and timelines is imperative. A QFR is a question submitted by a Member of Congress after a hearing concludes, typically due to insufficient time at the hearing to question the witness, or it can be a question submitted by a Member who did not attend the hearing. IFRs are questions asked during hearings that the witness cannot answer immediately. Typically, the witness will respond by

1 Mar 2024

saying that he or she will take the question for the record. Responses to IFRs are inserted at the appropriate place in the hearing transcript as if the answer were given during the hearing. These taskers are answered in the voice of the individual conducting or testifying at the hearing. QFR and IFRs must be answered as if the individual were still testifying in the chamber upon the date the hearing was conducted. Only include information in QFRs and IFRs that was available or known at the time the witness testified. HS, IFR and QFR are completed per guidance in this chapter and reference (g).

b. Task Initiation.

(1) Subject. Congressional Tasking follows similar subject naming convention as regular taskers but begins with the tasker “subcategory” followed with the applicable subject matter. Examples: “RFI – Manning Gaps Afloat” and “CRR – pg 213-214 sec 3 MARK VI Boats.”

(2) Suspense Date. Initiators must account for specific requests from Professional Staff Members or Members of Congress that may drive shorter turnaround times and internal suspense. If less than 10 business days, Initiators should reach out to DNS-17 Congressionals (and the anticipated drafter) to convey the urgency of the request. Otherwise, the request will be seen as routine.

(3) OLA and FMBE must change this field to “Navy.”

(4) SSIC. Mark “7000-19 Congressional Relations.”

(5) Priority. Mark Normal for Routine taskers.

(6) Authority for informal taskers (unless an HS by DCNO or Component Principal) mark as Government Official, Flag Officer, Senior Executive Service shown in ETMS2 as “GO/FO/SES.”

(7) Category. Select “Congressional.”

(8) Congressional Sub-Category. Select the type of tasker or Congressional deliverable (RFI, RFB, QFR, IFR, Program Brief, HS, Fact Sheet, RTC or CRR).

(9) Type instructions for DNS and drafters, then click save. (Example in Figure 3.1.)

1 Mar 2024

1. POC for questions regarding this tasker: CDR John Stamos; 704-695-6737; john.b.stamos.mil@us.navy.mil
2. Purpose: Respond to SAC-D RFI on Navy J-Books in support of SAC-D markup
3. Deliverable: Mr. John Lucio (SAC-D) requests a response to the following RFI regarding VIRGINIA class propulsion plant funding in Navy justification materials:

Identify how the propulsion plant budget reductions referenced in the P-10 were distributed to other P5 categories and fiscal years across the FYDP
4. Background: (Reference from VIRGINIA J-Book) “VCS propulsion plant budgets have been reduced beginning in FY 2023 as a direct result of a steady demand signal. The Navy's two VCS per year cadence, the two-CVN buy of CVN 80 and 81, ramp up to serial production of COLUMBIA, construction schedule accelerations that reduce production gaps between COLUMBIA shipsets and the support of 3-year AP funding for COLUMBIA has level-loaded demand and allowed optimized use of capacity across the nuclear industrial base. Preparations for generational shipbuilding volume included implementation of streamlined processes that eliminated unneeded overhead, optimized material procurements and improved production. Providing a consistent demand signal to principal suppliers has improved the efficiency and effectiveness of Naval Reactors' long-term planning, including required vendor self-capitalization. Additionally, retirement of technical and schedule risk with the successful plant criticality of the first Virginia Forward Fit nuclear reactor core in SSN 792 (VERMONT) also supports budget reductions.”
5. Short Suspense: 21Jun suspense to support upcoming visit.
6. Assignments: Recommend NAVSEA (08) and PMS 450 draft, N97, FMB 2 and DASN (Ships) chop

Figure 3.1: Example Congressional “My Instructions”

(10) Use “Manage Assignments” and add “DONPIC” as OPR and click send.

Note: At times, OLA will require expedited processing of Advanced Proposed Questions (APQ), QFR or IFR responses. When the response time is limited (often less than 48 hours), OLA handles the process from initiation to completion outside of ETMS2 without DONPIC involvement. Once compiled, reviewed, approved and cleared, OLA enters the final product into ETSM2 for historical reference.

c. Task Processing.

(1) DONPIC will review the tasker, enter timelines for draft submission, track completion and edit the final product once task completion is achieved by the drafter.

(a) If drafter requires additional support to complete inputs for their draft, the OPR may assign additional OCR organizations as necessary to provide a completed draft for review by equity holders. Use “Manage Assignments” to request OCR submission. Edit the “OPR OCR Details” to describe what is required of the OCR assigned.

(b) When tasker from OLA or FMBE required three or more drafters and multiple reviewers, DONPIC will sub-section these and place the “master tasker” number in the “external ID” field. When all sub-section taskers are completed, DONPIC compiles final responses for routing or return to OLA or FMBE.

(2) File naming should be concise while still containing pertinent information.

Note: There is a max character number for file name titles and certain punctuation symbols are not allowed: &, *, \$, @.

(a) Draft file name example – “DRAFT-PEOIWS-RFI 3MXV-05MAY2024.”

(b) Chop file name example – “CHOP-DASNSHIPS RFI 3MXV-10MAY2024.”

(c) Final file name example – “FINAL-PEOIWS RFI 3MXV-15MAY2024.”

(3) Informal DONPIC Congressional routing. All congressional taskers are required to obtain coordination and chops from equity holders prior to task completion.

(a) Coordination Route or chops. Utilizing the “MANAGE ASSIGNMENTS” button, congressional teams are able to facilitate coordination on a draft proposal. When a draft response is ready for coordinating chops, send the task to “DONPIC CHOP (Review and Coordination)” as OPR and list equity holders for additional OCR assignments in the instructions to DONPIC.

(b) DONPIC CHOP team will assign OCR teams based upon instructions and historical references. See Figure 3.2 for example “OCR Instructions” for review or coordination. The My Assignments “OPR OCR details” tab must be annotated with recommended reviewing organizations, directions for reviewers and details about what file name and file location is for review. Provide original task instructions below the requested OCR assignments.

1. Draft ORG POC: Mr. Sailor McKenna; sailor.mckenna.civ@us.navy.mil; 703-333-3333

2. Deliverable:

- Request OCR review of Draft Approved by RADM A. Holsey (CNPC) in supporting documents: “DRAFT-RFI-NAVSEA-RGXG”

- Upload chops as “CHOP-ORG-RFI 3MXV-10MAY2023.”

3. OPR – DONPIC CHOP, OCR: RD&A Congressional, M&RA Congressional.

Original Instructions:

Figure 3.2 Congressional “My Response” for Coordination Approval

(c) Directions for reviewers:

1. Review the draft document for format, content and nomenclature.

2. Use Microsoft “Track Changes” for recommended changes, additions or deletions or a DD-818 form. Save the copy of the draft document as “CHOP - ORG (original document title) - DATE.” For example “CHOP-DASNSHIPS-RFI 3MXV-18MAY2023.” For dates, utilize DDMMYYYY format. Use “save as” to save the new copy to the Tasker SharePoint or upload from a saved location to Supporting Documents.

3. Offices chopping documents place their comments in the My Response section as well as in the Tasker Notes section if there are considerable comments or non-concurs. This increases visibility to all personnel viewing the task quickly and efficiently.

4. Only DONPIC is authorized to cancel chops for coordination offices. After 5 days of an organization assigned and accepted, DONPIC will communicate with the coordinating office prior to cancellation of chops, or the coordination office should request an extension in ETSM2.

5. Classified Responses. If a SIPR tasker does not exist to correspond to a “SIPR Action Tracker” classified NIPR tasker, the designated drafter will initiate a task for coordination and routing of documentation in the SIPR ETMS2 environment. Corresponding NIPR tasker will have a mirror route in order to notify NIPR teams that they have a tasker ready for their review in the SIPR environment.

(d) SLAP Route. Before task completion, submit final draft to leadership for final approval utilizing organization internal review requirements. My Response template in Chapter 4 Figure 4.2 provided as an example. When SLAP route is complete, Task Manager must verify the correct approved final copy is in Final Documents, response section filled out as annotated in Figure 3.3 and then click the “complete” action button. DONPIC will conduct a final review and

1 Mar 2024

submit to either external DoD approval (Defense Office of Publication and Security Review (DOPSR) and OMB, return to the Initiator for delivery to Capitol Hill, or both. More details about DOPSR and OMB review found in subparagraph 2d(2).

Final approved by VADM Cheeseman, CNP.

Final document provided “FINAL – DON-220526-2WKD-IFR-MAY-22-HASC_DON_Posture-2JUN23.docx”

(If applicable: CHOPs for N## cancelled due to route overdue by 10 days.)

Figure 3.3: My Response after adjudication by leadership

d. Task Completion.

(1) Informal congressional taskers are completed as expeditiously as possible (reference f). The OPR is expected to meet individual assigned due date as published in ETMS2. If unable to meet the due date, an extension request should be submitted in the system by the drafter and forwarded by DNS to the initiator for approval. The initiator can extend or modify the suspense date by first changing it in the tasker header information, saving, click “Manage Assignments”, adjust the OPR due date under “OPR OCR Details” then click “send.”

(2) Security Clearance and Public Affairs. Hearing Statements, QFR and IFR products must be cleared by DOPSR and OMB. DONPIC forwards final chopped and approved drafts to DOPSR for clearance. DOPSR responds with amendments, recommended changes or clearance. OLA or FMBE (dependent on the initiator) will forward the DOPSR cleared products to OMB.

(a) When OMB clears the product, it is returned to the witness.

(b) This process can take approximately 3-6 business days or longer, depending on the length of the product to be reviewed.

(c) When CNO or SECNAV are witnesses, 3-star approval or equivalent is required to approve the drafts for CNO and SECNAV review. Legal review is always required by drafting authority as well as CNO and SECNAV General Counsel (GC).

e. Presidential Budget Fiscal Year (FY) Program Briefs and Fact Sheets.

(1) Anticipated topics and products must be completed in the requested format provided by OPNAV N8 and FMBE to ensure uniformity in presentation to CNO and SECNAV for review.

1 Mar 2024

(2) Microsoft TEAMS is utilized for requirements, announcements and updates throughout the FY budgetary season. Reach out to OPNAV N8 Congressional for inclusion to the Microsoft PB FY## Team (FlankSpeed account required).

(3) FY Program Briefs. Program Briefs are coordinated between DNS and FMBE for presentation to Congress. FMBE is the final approver of Program Brief templates, Program Brief topic list and timelines and will also assist in tasker instructions.

(4) FY Fact Sheets. Fact Sheets are developed every year by the Navy Staff to support SECNAV and CNO testimony to Congress. OPNAV N8 works with OLA, FMBE, OPNAV and the Secretariat to develop and tailor the Fact Sheet topic list to support hearing preparations. The list of topics and prescribed templates are shared with congressional team members and tasked formally by DNS in ETMS2.

3. Formal Congressional Correspondence

a. Formal Congressional Correspondence taskers include Congressional Reporting Requirements (CRR) (formerly known as Report to Congress (RTC)), Formal Letters and CI with action other than Direct Reply. Correspondence formatting and requirements are outlined in reference (i).

Note: Subparagraphs 3d(2)(a), 3d(2)(b) and 3d(4) apply to OPNAV only. ASN refer to internal business rules or reference (d).

b. For extensions on Congressional correspondence, White House constituent correspondence and CRRs, an interim letter must be provided and posted to ETMS2 for approval. The interim letter must state the reason for the delay in response and the date when the action office will provide the final response. Be realistic with the projection on the final response date and include time to coordinate. It is preferred to request the requisite amount of time to generate a reply the first time rather than to send a second interim reply. The approval authorities for extension requests are outlined in reference (e). For OSD-tracked taskers originating in CATMS, SECNAV CMD must receive OSD-level concurrence for extensions.

c. General Timelines for Formal Correspondence.

(1) CI - 10 business days for final response or submission of interim letter. Interim letters must state the next anticipated update or anticipated resolution (reference g).

(2) Formal Letters to Members of Congress – 5 business days (reference g)

(3) CRR – The National Defense Authorization Act (NDAA) outlines when CRRs are due to Congress. Consideration for routing must be taken into account when drafters are planning to submit their reports and when initiators are creating taskers. Allow 30 business days

1 Mar 2024

from final signature of DCNO to SECNAV (to allow review by DNS, CNO GC, VCNO, CNO) before forwarding to the SECNAV CLO.

d. Formal Congressional Correspondence is delegated by SECNAV Congressionals to ASN, DNS and DMCS for completion.

(1) Completed CRR packages should include in Supporting Documents:

(a) Cover Letters to Committee(s).

(b) Report (formatted per reference f).

(c) Cost to prepare the report using OSD Cost Guidance Tool found at https://costguidance.osd.mil/costguidance/studycostworksheet_prod.asp.

(d) Coordination sheet (complete with legal review).

(2) Completed CRR packages should include Action Memos in Final Documents:

(a) From DNS to CNO (via VCNO).

(b) From CNO to SECNAV.

(3) Templates for CRR documents are found in the DON Reference Library of ETMS2. Access by selecting TMT Support Area, then Congressional Tasking Guides and Business Rules, followed by SECNAV Congressionals folder. DON Reference Library is also accessed via the following link: <https://docs.etms2.army.mil/sites/DON21-1/referenceguides/SitePages/Home.aspx>.

(4) My Response section should be filled out as prescribed in Chapter 4 Figure 4.2 to DNS.

CHAPTER 4
ROUTINE TASKERS

1. Initiating a Tasker

a. Routine taskers are initiated at any level throughout the DON. Tasker workflow: 1) Initiated, 2) Assigned, 3) Accepted, 4) Work and Coordination, 5) Submit for Approval and 6) Complete or Close.

b. OPNAV Fields required for task initiation are specified in Chapter 4, subparagraph 1b(1) through 1b(13).

(1) Subject naming convention of Routine taskers begin with Organization abbreviation followed by the subject of the tasker. Example: “DNS- USN/USMC WARFIGHTER TALKS.”

(2) Suspense Date. System default is 10 business days from task initiation. Adjust this date as required for full tasker completion, routing and approval. Utilize “Manage Assignments” to adjust due dates for assignees.

(3) Warning Threshold. Default 72 hours. Task initiators may adjust if desired.

(4) External Tasker ID. Use this field to tag or annotate external filing systems if desired. If tasking comes from external sources outside the DON, this field is locked.

(5) Origin. System defaults to “OSD.” Change this field to “Navy.”

(6) Owner. Locked to initiating team.

(7) Standard Subject Identification Code (SSIC). Select appropriate SSIC for records management.

(8) Classification. Select classification of tasker. NIPR ETMS2, select up to SIPR Action Tracker. SIPR ETMS2, select tasker overall classification.

(9) Is Private. Do not check this box unless tasker contains PII information (ensure UNCLASS PII is also selected for classification).

(10) Priority. Select Normal.

(11) Authority. Select highest authority that ultimately will approve or sign your document or package. Accurate selection of the Authority is imperative for proper tracking and execution of approval route.

(12) Action. Select the action required by the Authority.

(13) Category. Select category based on tasker subject or SSIC.

2. OPNAV Instructions Format. Template items are outlined in subparagraphs 2a(1) through 2a(6) with an example in Figure 4.1.

a. POC for questions regarding the tasker (Name, email, phone contact number).

b. Purpose Statement. This should be a direct, concise statement that summarizes the intent of the task. The statement will include the OPR and their required action. Almost all SECNAV CMD level task require one of the actions outlined in subparagraphs 2a(2)(a)- 2a(2)(d):

(1) Obtain coordination.

(2) Obtain approval.

(3) Obtain signature.

(4) Provide Information.

EXAMPLE

1. POC for questions regarding this tasker: LCDR Task Manager, NX/ 703-695-1111 / Manager, Task.mil@us.navy.mil.
2. Purpose: Write a direct, concise statement that summarizes the intent of the task. The statement should include the OPR and their required action.
3. Deliverable/Action: The POC explains the products and format needed to satisfy the tasker. The POC gives direction on deliverables and format and provides labeling conventions for documents.
4. Background: Used to provide additional information that may help the AO provide a better product. Here you can anticipate AO questions and answer them ahead of time to reduce the number of calls and inquiries for clarification.
5. Short Suspense: Provide information on why a task may require a shorter than normal suspense date from the staff, if applicable.
6. Assignments: Provide the specific organizations that should be tasked through the Manage Assignments actions, including the OPR (lead) team and all known OCRs (assist) teams. Example: "N9 is assigned as the OPR. Please assign N7 and N3N5 as OCRs.

Figure 4.1: Example "My Instructions"

c. Deliverable. The POC explains the products and format needed to satisfy the tasker. The POC gives direction on deliverables and format and provides labeling conventions for documents.

d. Background. Used to provide additional information that may help the AO provide a better product. Anticipate AO questions, and answer them ahead of time to reduce the number of calls and inquiries for clarification.

e. Short Suspense (as appropriate). Provide information on why a task may require a shorter than normal suspense date from the staff.

f. Assignments. Provide the specific organizations that should be tasked through the Manage Assignments actions, including the OPR (lead) team and all known OCRs (assist) teams. Example: “N9 is assigned as the OPR. Please assign N7 and N3N5 as OCRs. The OPR may assign additional OCRs as needed for coordination.” Reminder, as stated in subparagraph 6e, always task to an organization’s “FRONT OFFICE” except as otherwise delineated in this instruction.

3. Tasker Delegation. See Chapter 1 paragraph 4.

4. Accept or Reject Task. Access the task via a link provided in the Outlook notification email tasker link or by accessing it through the ETMS2 tasker menu. Ensure subparagraphs 4a through 4c are correct prior to accepting a task. Reasons to reject a tasker include incorrect assignment, unclear instructions or the suspense date is not feasible. Rejections must be accompanied by a justification or recommendation.

a. Lead team (OPR) correctly assigned. When a tasker is assigned by the Initiator, the Primary OPR has 3 business days to “reject” a tasker that does not fall under the OPR’s cognizance or portfolio. After 3 business days, the assigned Primary OPR “owns” the task and must coordinate with the appropriate action office, provide point of contact information for the new action office willing to accept the tasker and obtain an extension (if required) before the tasker is transferred by DNS to another organization.

b. The task is clear and deliverables understood. If unclear, contact the applicable N-Code Front Office or DNS for assistance.

c. Suspense date is feasible and meets all required routing requirements.

d. Click the “Accept” action button to begin work and coordination. If subparagraphs 4a through 4c are not correct, understood or feasible, reject the task with the justification reason or recommendation.

5. File Names. Electronic files should be named, "TAB A - File name", "TAB B - File name" as specified in reference (a). Documents that require action or signature are placed in TAB A, usually an Action Memo. If multiple documents support the action document, continue in successive Tabs in the Final Document Library for leadership review. File names found in Supporting Documents should include the Organization's name submitting the document.

Note: There is a max character number for file name titles and certain punctuation symbols are not allowed: &, *, \$, @.

a. Example Final Document:

(1) "TAB A – ETP Request ICO COMPACFLT.docx".

(2) "DRAFT - TAB A – OPNAVINST 5521.1A for Coordination.docx".

b. Example Supporting Document: "CPF – SIPR Hierarchy User List.xlsx"

c. Action Memos or documents requiring final approval signature from different individuals must be a single individual file in the document library.

6. OPNAV "My Response" Format

a. Responses must include the minimum content in subparagraphs 4a(1) through 4a(2):

(1) "Recommendation(s)/Action". Provide a brief statement outlining the recommended course of action by the final approval authority and include brief supporting details.

(2) Background - Key Point(s). Input the critical information (i.e. the "BLUF" for leadership).

(3) Suspense Date: DD Mmm YYYY format. Briefly explain why the suspense date is set for that particular date. If the tasker is overdue or is projected to be overdue before leadership signs it according to submission timetables set in Encl. (2), an explanation is REQUIRED here. Overdue taskers that lack an explanation in the response section will be rejected or sent back to the originating office.

(4) Staff Action Documents. List all documents (e.g. tabs, annexes) requiring review or action by approver. For submission to leadership the files in Final Documents per reference (a). See Figure 8.4.

(a) All documents necessary for leadership consideration must be uploaded to the ETMS2, Final Documents SharePoint library. All files in ETMS2, Final Documents should be referenced here in the Staff Action Documents of My Response section of the task.

(b) Files will include appropriate security classification markings per reference (i).

(c) Strict adherence to file naming conventions is important. Electronic files should be named, "TAB A - File name", "TAB B - File name". Use this naming convention when saving files. Use this format when listing attachments in this section.

(i) TAB A. Documents that require action (e.g., item for signature or approval) are placed in Tab A. If multiple action documents, continue in successive Tabs. Attachments or references will be numbered subordinate to the primary Tab. For example, if there is a letter as the primary Tab (e.g. Tab A), all of the attachments or references to that memo will start numbering as Tab A-1, A-2, etc.

(ii) TAB B. Incoming correspondence (if applicable). For OSD packages, include the original package as the primary Tab (e.g., TAB B). If there is multiple incoming correspondence included, these documents will be numbered subordinate to the primary Tab (e.g., TAB B), for example: TABs B-1, B-2, etc.

(iii) TAB C. Background information. If more than one tab is needed, tab accordingly. If substantive or lengthy background information is forwarded, provide a one-page executive summary of the information.

(iv) TAB D. Coordination information. Typically reserved for the last tab in a package. All coordination should be listed. Include office or department, point of contact, phone number, date the package was processed or coordinated and decision made. Principal-level review concurrences must be obtained from the principals themselves, or, in their absences, their principal deputy with the name of the reviewing principal listed on the coordination page. A non-concurrence necessitates comments at the coordination tab. If the package did not require coordination, state "none" on the action or info memo.

(5) OPR and Lead Organization. List the Principal or Deputy of the lead organization (e.g. the Primary OPR) who approved the action.

(6) OPR Action Officer. List the primary action officer (Name, Office, e-mail, Office Phone, Telework Phone [if applicable]).

(7) Staff Coordination. Include key agencies used to coordinate the action and the senior official who reviewed (i.e. Agency Name, POC, Date, Concur or Non-concur). For legal opinions, note the specific lawyer who reviewed the tasker. This will reflect the Senior Leader Approval Process (SLAP) or approval route that is required. This section is tailorable with respect to the Service inputs and Approval level required.

b. Example Response found in Figure 4.2.

- (1) Recommendation/Action. DNS, request you sign TAB A – The Title of TAB A in Final Documents
- (2) Key Point(s). Should mirror key points in the included Action Memo, if applicable. If not, summarize why this is being submitted for signature, approval or review.
- (3) Suspense Date/Leadership Suspense Date. List the suspense date in the tasker with a brief explanation of its importance. If the tasker is late or will be late before leadership signs it, an explanation is REQUIRED here, per Ch. 1, subpara. 4e(1).
- (4) Staff Action Documents.
TAB A. Documents that require action (e.g., item for signature or approval)
TAB B. Incoming correspondence
TAB C. Background information.
TAB D. (or last tab in package). Coordination information.
- (5) OPR/Lead Organization. List the Principal or Deputy of the lead organization (e.g. the Primary OPR) who approved the action.
- (6) OPR Action Officer. List the primary action officer (Name, Office, e-mail, Office Phone, Telework Phone [if applicable]).
- (7) Staff Coordination. Include key agencies used to coordinate the action and the senior official who reviewed (i.e. Agency Name, POC, Date, Concur or Non-concur).
- (8) STAFF COORDINATION: DNS-11, DNS-14, DNS-15, DNS-16, DNS-L

Figure 4.2: Example My “Response”

c. Coordination. Coordination from offices providing parallel input to a draft should be added as OCR via “Manage Assignments.” Coordination for review, chop or comment should utilize “Submit for Approval” so not to convolute the requested organization coordination prior to a draft being ready for review. Assign coordinating AO offices utilizing “Manage Assignment” or “Submit for Approval” when a final draft is ready to be reviewed by other equity holders. Set the due date that comments or review are to be completed.

(1) Directions for reviewers:

- (a) Review the draft document for format, content and nomenclature.

(b) Use Microsoft “Track Changes” for recommended changes, additions or deletions or DD-818 form. Save the copy of the draft document as “(original document title) (CHOP - ORG_DATE).” For example “CHOP - N8_01APR22.” For dates, utilize DDMMYY format. Save the copy to the Tasker SharePoint or upload it to Supporting Documents.

(c) Provide general remarks and a point of contact in the My Response section. Delete any template sections not utilized before responding and mark the tasker complete.

(2) Once Reviewer is complete, the OPR will receive a status update that all OCRs have completed the task and it is ready for review. The OPR is responsible for making annotated changes as provided by the OCRs and adjudication of remarks.

d. Updating Tasker Instructions. If an update to a tasker is made in any field other than the subject title, the updates must be sent to OPRs and OCRs via “Manage Assignments.” Updates must reflect in the “OPR/OCR Details” tab as well as the main body of the tasker. Clearly annotate what has changed or been updated since the task was first sent out by marking “UPDATE” or “CHANGE” next to the modified items in the instructions. Best practice is to follow the updated assignment of the task with an email to the organizations tasked utilizing the Tasker Status email function.

e. Completing Taskers. Taskers should be marked “complete” or “closed” within 1 business day notification of the following: “OPR/OCR Complete”, “Route Complete” and “Primary OPR Complete.”

(1) Final documents will be linked in the email notification to the Initiator or OPR automatically upon completion. The “My Response” submitted by OPRs will default to the My Response upon completing the task. OCR responses must be copied from the Tasker Status or the OCR copy of the task.

(2) Any tasker over 365 days overdue will be systematically closed by OPNAV Task Management without notice. Task initiators should ensure that suspense dates are updated and sent out to assigned teams to prevent automatic closure.

7. Managing Taskers

a. Task Assignment. When a task is assigned to a team, the assigned team has 3 business days to reject a tasker that does not fall under the assigned office’s cognizance or portfolio. After 3 business days, the assigned team must take for action or coordinate with the appropriate action office, provide point of contact information for the new action office that is willing to accept the tasker and obtain an extension (if required) before the tasker may be transferred to another agency. To reject a task before the 3 business day mark, select the “Reject” button on the action bar in the OPR copy of the task. A pop-up window will appear requiring the information outlined in subparagraph 10a(1) through 10a(3).

(1) Rejection Reason. Either recommend reassign task or provide other reason.

(2) Recommended Owner. The name of the organization or individual who should be assigned the task.

(3) Comments. Provide any additional information that may help the initiator re-assign the task.

(4) Follow-up Email. A follow-up email to the initiator is recommended to ensure the request is received.

b. Extensions. Extension requests must be submitted no later than 2 business days prior to the Suspense Date. All extension requests require a detailed reason, to include timelines and any pertinent information to support the request, prior to forwarding to SECNAV CMD or OPNAV Task Management (DNS Front Office) for concurrence and approval.

Note: To request an extension in ETMS2 click the “REQUEST EXTENSION” button. Users will be required to provide the Extension Days Requested and a justification for the extension.

c. Task reports. Secretariats must aggressively manage all tasks assigned to their N-code or organization. Review the “My Team / Team I Manage” view and use the “Advanced Search” mechanism (Figure 4.3) to create customized views to see data necessary to efficiently manage active tasking. Ensure taskers remain on-track and not overdue. ETMS2 training for the “Advanced Search” function is covered in the ETMS2 Advanced User Training and How-To Guides via MilSuite.mil (<https://www.milsuite.mil/university/etms2training/>).

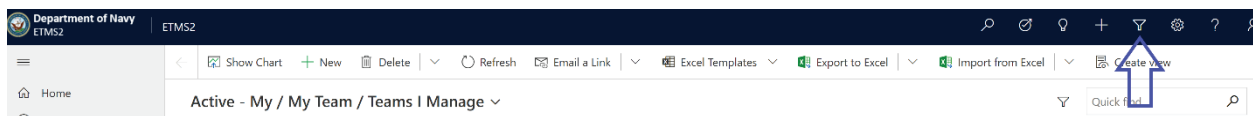

Figure 4.3: “Advanced Find”

d. Coordination task. Pay special attention to taskers in which the Team is assigned as OCR. Thorough coordination ensures that the final response is complete and correctly addresses all stakeholder equities. Coordinating offices are expected to reach out to the OPR assigned to ensure appropriate support is provided. OCRs should also be placed in the routing chain to review the final product before leadership reviews. This routing replaces the Coordination page for OPNAV tasking.

8. Electronic Approvals

a. Senior Leader Approvals. Routing and approval by Senior Leadership will be annotated and completed within the ETMS2 system. Action officers will submit to leadership via the “Submit for Approval” action button and place the appropriate routing chain template or manually enter leadership required to review and approve package being routed. Senior Leaders will login to their ETMS2 account and make approvals as required via a link provided in the Outlook email notification, the “My Approvals” tab or from the main menu for Approvals.

(1) The OPR will adjudicate all comments received from leadership.

(2) Modify the draft document as required and upload the completed document into the Final Documents library in ETMS2.

(3) The OPR will complete the “My Response” section of the ETMS2 Tasker per Figure 4.2.

b. Multiple approval routes can be active within a tasker, but only one approval route can be active per Team at a time. For example, two OCRs may have two separate approval routes open, but an individual OCR can only have one active route at a time.

c. Approval Route Terms.

(1) Stages. Senior Leader Approval Routes generally have multiple stages or levels of approval. Each stage executes sequentially and does not become active until the stage that precedes it is complete. Only assignees or administrators in an active stage can act and select one of the action sets assigned to them. A stage will not complete until all steps in that stage are complete.

(2) Steps. A Step is any User or Team in ETMS2 that is assigned to review or approve the staff package. A step must contain at least one action set. A stage can contain multiple steps. Approve with Complete or Approve with Release must be in the last Stage of the route.

(3) Designation as the Lead Organization. The route Initiator will designate a lead organization for the tasker, providing approvers with visibility of what organization has overall responsibility. By default, the Lead Organization will be the OPR under the Assignment that is initiating the SLAP. If there is no OPR, the Lead Organization will default to another entity.

(4) Legal Review. If legal review is required, the Route Initiator will define the office providing the legal review for the tasker.

(5) Consolidated Responses. Allows the Route Initiator to select the specific responses they wish to display to the approvers on the route itself.

(6) Primary Approver. Allows the Route Initiator to select a user or team in the approval route to be designated as the Approving Authority within the route.

(7) Action Pairs in route stage. Subparagraphs 3e(7)(a) through 3e(7)(f) outlines action pairs and usage.

(a) “Approve” or “Disapprove.” Approve allows the package to move to the next stage. Disapprove stops the process and allows the Initiator of the route to rework and re-open the route.

(b) “Approve with Release” or “Disapprove.” Approve with Release allows that step to release a proposed template email that is part of the tasker response. Disapprove stops the process and allows the Initiator to rework and re-open the route.

Note: This option should not be selected unless an email template is associated with the task.

(c) “Approve with Complete” or “Disapprove.” Approve with Complete completes the copy of the tasker for the assignee that executed the route if they were an OPR or OCR.

Note: For an Initiator the “Close” option must be selected or the tasker will remain active. Disapprove stops the process and allows the Initiator of the route to rework and re-open the route.

(d) “Concur” or “Non-Concur.” The Concur and Non-Concur action pair allows the Organization or Individual in a step to provide their coordination and recommendation while allowing the route to move forward to the next stage even if a Non-Concur is selected.

(e) “Information Only.” Recipient must acknowledge receipt.

(f) “Information Only / Flash Coordination.” Recipient must acknowledge receipt and review package for any changes or updates required or recommended. Flash Coordination is authorized by Director of Administration (DNS-1) or higher HQ leadership request for actions requiring DNS or higher authority.

(g) “Approve/Disapprove/Send Back to Previous Stage.” Allows for the same actions summarized in subparagraph 7c(7)(a) but adds the ability for the recipient to send the package to someone in a stage prior to the current Active Stage.

Note: “Send back to Previous Stage” does not stop the route as Disapprove does. Use of the action pair “Approve/Disapprove/Return to Previous Stage” is the preferred action pair over “Approve/Disapprove” as it allows for reopening of the approval route to the entity who “Returned” the package.

(8) Taskers requiring SECNAV or UNSECNAV approval must be reviewed by DNS, VCNO and CNO. See enclosure (2) for tasker timeline.

(9) Hard-Copy Staff Packages. Hard copy packages, if mandated, are not to be delivered to any office until DNS review is complete.

CHAPTER 5
SPECIAL TASKERS

1. Awards Taskers

a. All military awards requiring DNS or CNO approval must be vetted by the CNO Awards Board (OPNAV DNS-13). The awards board must submit to DNS no later than 60 days prior to the expected presentation date.

b. All military awards requiring SECNAV's approval are vetted by the Navy Department Board of Decorations and Medals (NDBDM). Civilian awards are vetted by the Executive Management Program Office (EMPO). Per SECNAVINST 1650.1J and DON Civilian Human Resources Manual (451-2), award recommendations are required to be submitted by the requesting command to arrive at the final awarding authority (NDBDM or EMPO) for adjudication 60 days prior to the desired presentation date, to allow sufficient time for administrative processing. For awards requiring review by the CNO Awards Board, an additional 30 days should be allowed. All awards requiring SECDEF approval are processed and forwarded from the NDBDM to SECNAV CMD no later than 90 days prior to the expected presentation date. See SECNAVINST 1650.1J for details regarding nomination timelines and delegation authority.

c. Submitting Awards.

(1) OPNAV 1650/3 Personal Award Recommendation should be submitted in ETMS2 via an electronic, fillable PDF vice scanned PDF. Attach all documentation in the "Original Documents" library of the Awards nomination. Awards are submitted to CNO Awards Board via the "Manage Assignments" module. Ensure DNS-13 Front Office is assigned as Primary OPR.

(2) If edits are required or the awards needs to be returned, DNS 13 will add the Route Initiator and DNS 13 to the approval route with a due date that revisions need to be completed in order to keep the award on track for submission. The "Edit Route" option should be utilized to keep all notes and comments within one complete route for submission to DNS 13.

(3) Ensure that taskers are initiated with "Request Type" field marked as "Award." This automatically marks the appropriate classification of UNCLASSIFIED PII. Award nominations submitted as request type "tasker" will be rejected.

d. CNO Awards Board. Awards taskers must be marked "private." When voting is complete, DNS-13 consolidates the package in the tasker final documents for route and approval to the appropriate award authority.

2. Directives Taskers

a. Directives are to be revised, re-issued or canceled no later than every 10 years. One year prior to the 10 year anniversary of a directives publication date, DNS-15 will create a tasker that requires the directive sponsor to begin processing the directive for revision, re-issue or cancellation.

b. Every directive submitted for revision or cancellation will include an OPNAV 5215/9 Request for Clearance of Proposed Directive and undergo a clearance review by legal and any other compliance reviewers, as applicable, as well as a coordination page or DD818 to record any required stakeholder review before submission to DNS-15 for final clearance and signature by directive sponsor.

(1) Compliance Reviews should be accomplished in sequential but can be done in parallel so long as all required compliance reviewers sign the same OPNAV 5215/9.

(2) Utilize an approval route for compliance reviews, NOT manage assignments.

3. Gift Acceptance. Gift acceptance taskers must be submitted to DNS with ample time for legal review. NO LESS THAN five days will be given for DNS-L to conduct a legal review of the gift acceptance package. Ensure that package are submitted to OPNAV Task Management or DNS-L no later than 30 days prior to anticipated date of gift receipt.

4. Organizational Change Request (OCR) Taskers. See OPNAVINST 5400.44B for details on initiating OCR taskers. Upon receipt, DNS will review request, place tasker into “staffing” status on chop, process required paperwork for approval package and send any required documents in message traffic back to the task initiator.

CHAPTER 6
ETMS2 BEST PRACTICES

1. SLAP

a. Senior Leaders should be assigned to their own team within ETMS2 with immediate support staff having By Direction (BYDIR) authority assigned as “Guest Users.” Front Offices should have at a minimum three teams: one for the Senior Leader, one for Deputy or Vice Senior Leader and one for the Front Office staff.

b. Track all assigned tasks to completion. Do not neglect a task after it enters the routing chain. An action completed is not a task completed.

c. Principals’ team names should include the name of the individual currently holding the title. This prevents inadvertent assignments by Task Managers at every level. For example, “Admiral Lisa M. Franchetti, CHIEF OF NAVAL OPERATIONS.”

2. Templates. The use of tasker templates for recurring taskers and routing templates are highly encouraged to reduce rework, corrections and offline email. To use a template created, click “Insert Template” or “Template” and search for the template necessary and click “Ok.” Using templates cuts down the time required to submit items for leadership approval into just a few clicks versus manually adding each entity to the electronic route.

3. Tasker Notes

a. The use of “Tasker Notes” is critical. The Tasker Notes block represents the most current status of the package in chronological order. The Tasker Notes section is used as a running conversation concerning the tasker. It does not send notifications that a comment has been made.

b. The My Response section is used for tasker responses and not tasker comments. To send email notifications, select the team name “check box” from the Tasker Status section at the bottom of a tasker and then click the available “Email” action button. This will generate a tailorable email to all members on the selected team(s).

c. Content Guidance. Comments must be self-explanatory and stand alone, but anticipate questions down-stream as the tasker moves through the system. Users should consider the questions “Who?”, “What?”, “When?”, “Where?”, “Why?” and “What’s next?” when entering comments into the Tasker Status. Clear, detailed comments minimize future questions and delays in staffing and approval of the final response. Examples of Status and Comments:

(1) Tasker Status Comment. DO NOT USE “Extension approved,” INSTEAD state “Extension approval by N81 (LCDR Gish) on 1600 12APR06. Due date change from 11APR to COB 18APR06 reflected in tasker.”

(2) Approval Route Comment. DO NOT USE “Non-concur,” INSTEAD state “OPNAVINST XXX reviewed by N6 (LCDR Jones) on 15APR06, significant or minor comments provided to document using track changes, see attachment.”

4. Error Reporting

a. If something does not look right, contact the Initiator or OPR. Examples of common problems include duplicate taskers for the same issue, attachments added to the wrong package (e.g., response for Senator Warner inadvertently added to a tasker from Senator Smith) and due date does not appear to meet timeline in tasker package, with no comment or explanation.

b. Report all system errors encountered to the AESD Portal or via phone 1-866-335-ARMY. Do NOT ignore error messages. The help desk can only correct errors for which they are made aware. Additionally, if it is an error that is recurring or a system bug, it needs to be documented and corrected. If no response to trouble tickets, contact DNS-1.

5. Custom Views and Reports

a. The use of customized views for fielding incoming and follow up of outgoing tasks as outlined in Chapter 1 is imperative to an organization managing and meeting expectations as outlined the CNO, SECNAV and SECDEF.

b. Using custom views and exported excel reports within an organization and with leadership increase visibility and leverage the proficiency and tools that ETMS2 can provide to Senior Leaders and Action Officers alike. Visit the many How-To guides on MilSuite for step by step instructions on how to create custom views, set up Microsoft Teams calls with DNS or reach out via email or phone to discuss the products or features desired in ETMS2.

6. Communication

a. Effective Task Managers ensure success with frequent communication with the OPNAV Task Management team as well as communication within their own organization. Emails, phone calls and Microsoft teams meetings are great tools to increase communication and transparency among organizations.

b. DNS 1 meets frequently with ETMS2 contractors and developers. Communicate desires of system capabilities to DNS1 to initiate reviews and requests for modifications. System updates will roll out periodically and present new system capabilities. Communication and outreach with DNS will ensure currency on any new functionality that is presented.

APPROVAL ROUTE EXAMPLES

1. Tasker Templates. Tasker templates are used throughout the DON to ensure that the appropriate personnel and leadership see required administrative items. Command and organizations will provide routing templates up to their front offices and one level above as required if further routing and approval is necessary.

a. Example 1:

STAGE 1	N9I TASKER GROUP
STAGE 2	OPNAV N9 FRONT OFFICE
STAGE 3	OPNAV N9 FRONT OFFICE STAFF
STAGE 4	OPNAV N9 FRONT OFFICE EXECUTIVE
STAGE 5	OPNAV N9 DCNO
STAGE 6	OPNAV N9 FRONT OFFICE
STAGE 7	OPNAV Task Management (DNS FRONT OFFICE)

Note: Insertion of the Secretariat organization after the DCNO signature (STAGE 6) allows for reformatting of My Response and notification that the package is ready to move to the next level.

b. Example 2:

Stage 1	OPNAV Task Management (DNS FRONT OFFICE)
Stage 2	DNS 1 Assistant Deputy Director for Administration
Stage 3	DNS 1 Director, Administration and Operations
Stage 4	DNS Front Office Executive
Stage 5	DNS Executive Assistant
Stage 6	Vice Director Navy Staff
Stage 7	Director Navy Staff
Stage 8	OPNAV Task Management (DNS FRONT OFFICE)
Stage 9	VCNO Front Office

TASKER TIMELINES

1. Approvals

a. General Correspondence. “Submit for Approval” should be used when requesting leadership approvals and signatures. If an organizations needs products or inputs prior to submission to leadership, then use “Manage Assignments” to collect those inputs as outlined in enclosure (1) subparagraph 2b. These timelines are the MINIMUM recommended amount of time required for approvals. Take these into account when creating suspense dates.

(1) DNS as Final Approver: Submission to “OPNAV Task Management (DNS Front Office)” NO LATER THAN 10 business days prior to event, function, travel, etc.

(2) VCNO as Final Approver: Submission to “OPNAV Task Management (DNS Front Office)” NO LATER THAN 15 business days to allow for processing and return to originator.

(3) CNO as Final Approver: Submission to “OPNAV Task Management (DNS Front Office)” NO LATER THAN 20 business days to allow for processing and return to originator.

(4) SECNAV or Under SECNAV as Final Approver: Submission to “OPNAV Task Management (DNS Front Office)” NO LATER THAN 30 business days to allow for processing and return to originator.

b. Congressional RFI, RFB, QFR, IFR Taskers are generally given 5 days to complete coordination and approval prior to submission to OPNAV DNS Congressionals (DONPIC) office and Office of Legislative Affairs. In general, process flow is 1 day for DNS 1st review, 2 days for external organizational chops and 1 day for finalization with the product being submitted on the 5th day.

(1) Overall Congressional Timeline for RFI, RFB, QFR and IFR.

(a) Task assigned to organization with 5 days to draft.

(b) Task sent for review and chop (1 day with DNS, 2 days with choppers).

(c) Task finalized (1 day).

(d) Task submitted “complete” (1 day).

(2) When available, a longer drafting time is given to organizations while still allowing for a minimum of 1 week to process coordination and approvals as outlined in enclosure (1), subparagraph 1b(1). In general, RFI and RFB taskers have 10 business days to be returned to Congress. While QFR and IFR taskers allow for 30 days to be completed, QFR and IFR require

additional reviews for public release. They are to be cleared for public release by DOPSR and OMB within the Office of the Secretary of Defense. 3 business days are allotted for both DOPSR and OMB (total of 6 working days to process).

c. Correspondence Type.

(1) CNO Awards: 60 days prior to award date. “DNS-13 Front Office (Awards).” Awards submitted late, must include late letter digitally signed by the ECH I or ECH II leader in the unit’s chain of command.

(2) SECNAV Awards: 90 days prior to award date to “DNS-13 Front Office (Awards)” for CNO board and forwarding of award recommendation. SECNAV Awards Board (NDBDM) process is generally 30-90 days for completion once received by the NDBDM. Due to board member scheduling, there is no set schedule for boards to convene. Awards submitted late, must include late letter digitally signed by the ECH I or ECH II leader in the unit’s chain of command.

(3) Alcohol Request Chits: NO LATER THAN 10 business days prior to event to “OPNAV Task Management (DNS Front Office). Late letter required, signed by Principle if inside of 10 business day period.

(4) Official Change Request (OCR): Upon receipt of an endorsed OCR, OPNAV action should take less than 30 days to complete when CNO level approval is required. Echelon 2 commands should upload actions requiring SECNAV approval into ETMS2 at a minimum 60 days prior to the date in block 4h of the OCR form. A standard OCR action within the boundaries of the United States is depicted in table 1-2 of OPNAVINST 5400.44A. The goal for actions requiring a change in homeport or PDS is to have them approved 1 year prior to the effective date, therefore they should be submitted no later than 14-18 months in advance.

(5) Gift Acceptance Approval: NO LATER THAN 15 business days prior to acceptance.

2. Tasker Assignments. Taskers should be “Assigned” to organizations when a product or requirement is necessary to complete a package to route for leadership approval.

a. Task initiators should allow for NO LESS THAN 10 business days for task completion.

b. Tasks should be entered into the system as soon as there is a requirement identified to allow organizations to process and further delegate to the lower echelons for completion. Keep in mind items originating from OSD often travel through 5-10 layers or offices before arriving at the right organization for response. Entering reoccurring taskers via “Tasker Templates” is also a good way to help organizations plan and prioritize their current tasking.
