

DEPARTMENT OF THE NAVY
OFFICE OF THE CHIEF OF NAVAL OPERATIONS
2000 NAVY PENTAGON
WASHINGTON DC 20350-2000

OPNAVINST 6110.1L
N171A
29 Dec 2025

OPNAV INSTRUCTION 6110.1L

From: Chief of Naval Operations

Subj: PHYSICAL READINESS PROGRAM

Ref: (a) OPNAVINST 6100.2A
(b) DoDI 1308.03
(c) SECNAVINST 6120.3A
(d) OPNAVINST 6100.3A
(e) MILPERSMAN 1910-171
(f) MILPERSMAN 1611-010
(g) VA/DoD Clinical Practice Guideline for Screening for the Management of Adult Overweight and Obesity of July 2020 (NOTAL)
(h) OPNAVINST 5102.1E
(i) BUPERSINST 1430.16G
(j) BUPERSINST 1610.10H

1. Purpose. To establish policy and requirements for the Navy's Physical Readiness Program (PRP) to ensure Active Component (AC) and Reserve Component (RC) Service members maintain a healthy lifestyle required to support overall mission readiness per references (a) through (j).

a. This instruction describes the Navy's PRP requirements, defines responsibilities for compliance, and establishes required minimum standards of physical fitness.

b. Significant changes include:

- (1) Command requirement for Service member physical training every workday.
- (2) Guidance for physical fitness testing for combat arms occupations.
- (3) Updated Body Composition Assessment (BCA) policy and procedures.
- (4) Updated guidelines for Sailor participation in the Physical Fitness Assessment (PFA) and Combat Fitness Assessment (CFA) after a post-pregnancy or postpartum period.

(5) Guidance on PFA and CFA related personnel actions and documentation on Fitness Reports and Performance Evaluations. This instruction is a complete revision and should be reviewed in its entirety.

2. Cancellation. OPNAVINST 6110.1K.

3. Scope and Applicability. This instruction applies to all AC and RC Service members, commands, and activities. PRP Guides are available for download on the Physical Readiness website accessed via MyNavy HR and are considered official supplements to this instruction.

4. Discussion. It is important for Service members to maintain an optimal level of physical fitness necessary to maximize medical readiness and deployability. Per reference (a), the Navy understands that a holistic approach is necessary to promote overall wellness through exercise, nutrition, physical and mental health, healthy sleep habits, weight control, tobacco cessation, and alcohol abuse prevention education. The primary focus of this instruction is to define the policies and requirements for maintaining and assessing overall Navy physical readiness.

a. Nutrition is a critical component of physical readiness and overall operational capability that optimizes strength, endurance, cognitive function, and recovery, directly contributing to mission performance. Performance nutrition initiatives, including Go for Green and Navy Mission Nutrition, advance readiness by ensuring consistent access to nutrient-dense options and education.

b. Physical activity is a fundamental element of one's physical and mental health, mission performance and readiness. Incorporating physical activity into the work week prepares Service members for operational demands today and in the future.

5. Policy. Navy AC and RC Service members must meet minimum physical fitness standards for continued naval service. Per reference (b), Service members must maintain physical readiness through appropriate nutrition, sleep, health and fitness habits.

a. Accountability. Physical fitness standards will be maintained throughout the year, not solely at the time of testing. Service members who fail to adhere to the contents of this instruction are subject to administrative actions.

b. Command Physical Readiness Program. Commanding Officers (CO) are overall responsible and accountable for the physical fitness of their personnel. COs must establish and maintain an effective, year-round physical readiness program.

(1) Nutrition environments must be assessed to ensure higher priority and availability of healthy food choices. Additional information on nutritional environment assessment tools used are detailed in supplemental PRP Guide-10 (Nutrition Resources). Recommended tools to assess nutritional environments include:

(a) “Go for Green” Program Fidelity Assessment Tool.

(b) Military Nutrition Environment Assessment Tool.

(2) Commanders, COs, and Officers in Charge (OIC) must maintain a critical balance which maximizes lethality and survivability for their unit(s) and personnel across all mission areas. Commanders, COs, and OICs will apply operational risk management in establishing physical fitness standards and expectations within their unit(s), while ensuring all Sailors participate in physical training every workday. Commanders, COs, and OICs retain the authority to temporarily suspend physical training when mission demands, material limitations, or personnel risks exceed acceptable levels. Working hours will not be extended to meet this direction as physical training is a standard part of a Service member’s day alongside rate training, maintenance, drills, watch-standing, leader development, meals, sleep, and normal mission requirements. Recommended physical activity guidelines for physical readiness include:

(a) Cardiorespiratory Training: 2 hours and 30 minutes (150 minutes) per week (e.g. 50 minutes three times per week or 75 minutes two times per week).

(b) Strength Training: 2 to 3 days per week using a variety of exercises and equipment to work all major muscle groups.

(c) Neuromuscular Training: 2 to 3 days per week, 20 to 30 minutes in duration, with exercises involving motor skills (e.g. agility, balance, coordination, gait) and natural or job-related movements.

(d) Flexibility and Mobility: 2 to 3 days per week.

(3) Additional guidance for maintaining the necessary physical performance capabilities in combat arms personnel can be found in the supplemental PRP Guide-5B (Policies and Fitness Testing for Combat Arms Occupations).

c. Assessment of Physical Readiness. Personal physical readiness is assessed with the Navy PFA on all Navy personnel. An additional Navy CFA will also be used to assess combat physical readiness for Combat Arms personnel. The PFA consists of the BCA and the Physical Readiness Test (PRT). The CFA consists of the BCA and the Combat Fitness Test (CFT). Participation is required regardless of sex, age, rank, title, billet, pending separation or retirement request status. Service members on terminal leave are not required to participate in the PFA.

(1) Service members are required to participate in scheduled PFA and CFA cycles as appropriate for their duty status (i.e. Active-Duty vs Drilling Reserve) unless excused for medical reasons, pregnancy or post-pregnancy and postpartum, or operational requirements.

(a) Non-Combat Arms Occupations. Personnel in non-combat arms occupations will complete the PFA as assessment of their physical readiness.

1. AC personnel are required to participate in two PFAs per calendar year and that are designated as Cycle-1 and Cycle-2.

2. RC personnel on Active-Duty orders for 1 year or more, to include Training and Administration of Reserve (TAR) personnel, are required to participate in two PFAs per calendar year.

3. Drilling and RC personnel on Active-Duty orders less than 12 months are required to participate in at least one PFA per calendar year.

(b) Combat Arms Occupations. Specific guidance is available in the supplemental PRP Guide-5B (Policies and Fitness Testing for Combat Arms Occupations).

1. AC Personnel are required to participate in the PFA and CFA every 12 months.

2. RC personnel on Active-Duty orders for 1 year or more, to include TAR personnel, are required to participate in the PFA and CFA every 12 months.

3. Drilling and RC personnel on Active-Duty orders less than 12 months are required to participate in CFA once each calendar year.

(c) Medical Waivers. Sailors who are seeking a medical waiver for the BCA, the PRT or CFT must utilize the appropriate fitness assessment medical clearance and waiver NAVMED form. If a member is issued a BCA medical waiver, they are still required to participate in the PRT or CFT if medically cleared. Additional guidance on medical waivers can be found in supplemental PRP Guide-6 (Medical Clearance and Waiver Management).

(d) Pregnancy and Postpartum. Sailors are exempt from participating in the PFA and CFA from the time a pregnancy is confirmed by a Health Care Provider until the end of 12 months after giving birth, loss of pregnancy, or stillbirth. This allows post-pregnancy and postpartum Sailors time to fully recover in a healthy manner prior to being required to meet fitness and body composition standards. Sailors who complete their 12-month post-pregnancy and postpartum PFA and CFA deferment period must participate in the PFA or CFA cycle in which their deferment period expires, provided they are medically cleared for PFA or CFA participation. For further details, consult the supplemental guide, PRP Guide-8 (Managing Physical Fitness Assessment Records for Pregnant Sailors), including postpartum management.

(2) The PFA and CFA include:

(a) Medical Screening: Medical screening includes an annual Periodic Health Assessment (PHA), Deployment-Related Health Assessment (DRHA), a Physical Activity Risk Factor Questionnaire (PARFQ), Pre-Physical Activity Questions, and when necessary, clearance approval on the proper NAVMED medical clearance and waiver form. Refer to references (c) and (d) concerning PHA and DRHA for individual medical readiness. Additional details regarding medical screening can be found in supplemental PRP Guide-6 (Medical Clearance and Waiver Management).

(b) BCA: Body composition has been shown to be related to health risks and musculoskeletal injury. Assessments of body composition are done to gauge fleet readiness in the context of these health and injury risks.

1. Sailors are required to complete an official BCA, regardless of ability or authorization to participate in the PRT or CFT portion of the PFA or CFA. Sailors with an overdue or an incomplete PHA, DRHA or PARFQ are still required to complete a BCA. The BCA must be completed within 45 days of, but not less than 24 hours prior to, participation in the PRT or CFT. The official BCA is the first and only BCA taken during the official PFA or CFA cycle. If the recorded PRT or CFT is not completed within 45 days of the official BCA, the CO may assign a participation status of Unauthorized Absence for the PRT or CFT. This policy applies to both active and reserve Sailors.

2. BCA Methods. Appropriate methods to determine BCA are delineated in reference (b). The supplemental PRP Guide-4 (Body Composition Assessment) provides expanded information on the BCA methods, procedures, and standards.

3. BCA Exemption for Exceptional PRT Performance. It is recognized that some Sailors who do not meet the BCA standard are still able to maintain operational readiness.

a. Sailors who are not within standards for the BCA, but meet the exceptional performance criteria on their official PRT may be eligible for a high-performance exemption. The supplemental PRP Guide-1 (Physical Readiness Program Policies) provides expanded information on specific requirements, criteria, and documentation guidance.

b. The BCA exemption does not apply to new accession Sailors.

(c) Fitness Testing - PRT: The PRT is a series of physical modalities that assess cardiorespiratory fitness, and muscular strength and endurance.

1. Cardiorespiratory fitness. The standard method to assess cardiorespiratory endurance is the 1.5 mile run or walk test. Alternate cardio options that may be utilized to gauge cardiorespiratory endurance include: stationary bike, treadmill, Concept-2 rower and 500-yard or 450-meter swim tests. Authorization to use alternate options is at the CO's discretion.

2. Muscular strength and endurance. The standard methods to assess muscular strength and endurance are pushups and the forearm plank, of which no alternates are permitted. These modalities assess the Sailor's ability to sustain muscle contractions over a prolonged period without undue fatigue.

3. The supplemental PRP Guide-5A (Physical Readiness Test (PRT)) provides expanded information on the procedures to conduct the PRT portion of the PFA. The supplemental PRP Guide-5B (Policies and Fitness Testing for Combat Arms Occupations) provides expanded information on the procedures to conduct the PRT and the CFT that are specific for personnel in combat arms occupations.

(d) Fitness Testing - CFT: The modalities for the CFT assess performance characteristics specific to combat arms occupations and may vary based on the physical performance needs of each specific designator identified as a combat arms occupation (i.e. designators with missions specific to the aquatic environment will have components related to assessment of aquatic adaptability). The supplemental PRP Guide-5B (Policies and Fitness Testing for Combat Arms Occupations) provides expanded information on the procedures to conduct the CFT portion of the CFA.

d. Failure to Meet PFA and CFA Standards. Per references (e) and (f), Sailors who fail to meet PFA and CFA standards may be subject to administrative actions as required by the appropriate separation authority. Additional guidance on PFA-related personnel actions and documentation for Non-Combat Arms personnel is available in the supplemental PRP Guide-1 (Physical Readiness Program Policies). Additional guidance on CFA-related personnel actions and documentation for combat arms personnel is available in the supplemental PRP Guide-5B (Policies and Fitness Testing for Combat Arms Occupations).

e. Medical Clearance and Waiver Management. Sailors with two consecutive medical waivers for the same medical condition, or three in the most recent 4 year period for the same medical condition that resulted in the Sailor not participating in the BCA or not participating in two or more PRT or CFT events, must be referred for a Medical Evaluation Board (MEB). MEB findings and unique medical situations will be forwarded to Commander, Navy Personnel Command (COMNAVPERSCOM) for disposition.

f. Permanent Change of Station (PCS) Restrictions. Any programs or billets that have specific PFA and CFA requirements will be announced in its governing instruction. For further guidance, Sailors should contact their rating detailer within COMNAVPERSCOM. Reservists may transfer if they are changing their home of residence.

6. Actions and Responsibilities

a. Deputy Chief of Naval Operations, Manpower, Personnel and Training (CNO N1) must:

- (1) Develop Navy-wide physical readiness policy and provide oversight.
 - (2) Assign Director, Navy Culture and Force Resilience Office (OPNAV N17) to:
 - (a) Review and make final determination on Exception to Policy requests.
 - (b) Oversee the Navy Fitness Advisory Committee and Nutrition Advisory Board, which provides physical readiness guidance and recommendations in alignment with Navy mission readiness.
 - (3) Provide program management on PRP policies to include: overseeing Command Fitness Leader (CFL) curriculum, certification courses, recertification seminars, waiver compliance, accession point training programs, and the management of Physical Readiness Information Management System (PRIMS).
 - (4) Maintain Navy enlisted classification and Additional Qualification Designator for CFLs.
 - (5) Provide direct community management for all PFA-related matters affecting Office of the Chief of Naval Operations (OPNAV), Nuclear Propulsion Management Branch (OPNAV N133) personnel. All community management and policy decisions affecting Naval Nuclear Propulsion Program (NNPP) personnel must be routed through the echelon 3 Commander and referred to OPNAV N133 for review and approval.
 - (6) Provide direct community management for all PFA and CFA-related matters affecting OPNAV, Naval Special Warfare (COMNAVSPECWARCOM) Management Branch (OPNAV N137) personnel. All community management and policy decisions affecting COMNAVSPECWARCOM Program personnel must be routed through the echelon 3 Commander and referred to OPNAV N137 for review and approval.
 - (7) Provide support for community management recommendations for all PFA and CFA-related matters affecting combat arms occupations designated within the Commander, Naval Expeditionary Combat Command (COMNAVEXPDCMBTCOM). Community management and policy decisions affecting COMNAVEXPDCMBTCOM personnel must be routed through the echelon 3 Commander and referred to the applicable OPNAV and Bureau of Naval Personnel (BUPERS) offices for review and approval.
 - (8) Provide “Train-the-Trainer” courses to certify instructors for the CFL Certification Course. Provide quality assurance and assistance to Commander, Navy Installations Command (CNIC) for CFL training and certification courses.
- b. CNIC must:

(1) Provide fitness staff and facilities for physical fitness training at CNIC installations, ensuring that Morale, Welfare, and Recreation (MWR) CFL instructors and fitness staff comply with PRP policies when assisting with official PFAs and organized physical training (PT).

(2) Ensure MWR CFL instructors maintain Navy's physical readiness standards.

(3) Schedule and deliver CFL certification courses based on installation demand.

(4) Disenroll students from CFL course who do not meet BCA or PRT requirements (measured by MWR CFL instructor at the time of the class) or who do not achieve a passing grade on the final written tests.

c. Bureau of Medicine and Surgery (BUMED) must:

(1) Establish guidelines to ensure consistency of Authorized Medical Department Representative's BCA, PRT, and CFT clearance and waiver recommendation process.

(2) Develop and execute a training program for physicians, nurse practitioners, physician assistants and Independent Duty Corpsmen on proper procedures for BCA, PRT, and CFT medical screening and waivers.

(3) Provide management and oversight of the Navy's official weight management program.

(4) Ensure medical departments and medical staff are aware of and comply with reference (g).

d. Commander, Naval Special Warfare Command (COMNAVSPECWARCOM) must:

(1) Establish guidelines for the CFT as appropriate for combat arms occupations designators within COMNAVSPECWARCOM.

(2) Ensure all combat arms personnel and candidates meet or exceed physical readiness standards.

(3) Conduct PFA and CFA on all combat arms personnel.

(4) Ensure compliance with PRP reporting requirements.

(5) Establish policy for combat arms occupations pertaining to timing of PFA and CFA counseling for failures and conducting remedial programs appropriate for combat arms personnel.

(6) Provide community management recommendations for all PFA and CFA-related matters affecting combat arms occupations within NSW.

e. COMNAVEXPDCMBTCOM must:

(1) Establish guidelines for the CFT as appropriate for assigned combat arms occupations designators.

(2) Ensure all combat arms personnel and candidates meet or exceed physical readiness standards.

(3) Conduct PFA and CFA on all combat arms personnel.

(4) Ensure compliance with PRP reporting requirements.

(5) Establish policy for combat arms occupations pertaining to timing of PFA and CFA counseling for PFA failures and conducting remedial programs appropriate for combat arms personnel.

(6) Provide community management recommendations for all PFA and CFA-related matters affecting assigned combat arms occupations designators.

f. Commander, Naval Education and Training Command (NETC) must:

(1) Ensure all recruits meet or exceed physical readiness standards by completion of recruit training.

(2) Establish a PRIMS account for each recruit and enter final PFA score prior to completion of recruit training.

(3) Conduct a PFA on all members attending schools greater than 10 weeks in duration, unless the member has previously completed an official PFA during the respective cycle.

(4) Develop and maintain a NETC PFA policy that includes at a minimum, an official PFA record for students in a “set back” status or medical hold status who are onboard greater than 10 weeks during an official PFA cycle.

(5) Ensure compliance with standardized fitness and nutrition programs, in coordination with PRP Office.

(6) Establish a physical readiness program at all schools, regardless of duration.

g. Commander, Naval Supply Systems Command (COMNAVSUPSYSCOM) must:

(1) Liaise with Defense Logistics Agency (DLA) to ensure prime vendors are compliant with selected and purchased food and beverage products meeting Department of War (DoW) procurement and DoW menu standards.

(2) Train Culinary Specialists and Food Service Officers to comply with DoW and the Secretary of the Navy's (SECNAV) requirements.

(3) Ensure compliance with standardized nutrition education programs in shore and afloat dining facilities.

h. Commander, Naval Safety Command (COMNAVSAFECOM) must: Collect and analyze data on PRP injuries and deaths, per reference (h).

i. COMNAVPERSCOM must:

(1) Establish policy related to administrative actions associated with PFA and CFA performance.

(2) Ensure PFA and CFA results are incorporated into the promotion, advancement, and reenlistment processes per reference (i).

(3) Ensure PFA and CFA requirements are incorporated into personnel transfer and detailing decisions.

(4) Evaluate PFA and CFA MEB findings for disposition.

j. Commander, Navy Reserve Forces Command (COMNAVRESFORCOM) must:

(1) Ensure drilling reservists, including voluntary training unit members, complete PFAs and CFAs per this instruction.

(2) Ensure reserve unit commanders, COs, OICs, and reserve healthcare professionals assist, advise, and educate command members in implementing the PRP.

(3) Ensure compliance with PRP reporting requirements.

(4) Establish policy for drilling reservists pertaining to timing of PFAs and CFAs, counseling for PFA and CFA failures, and conducting a Fitness Enhancement Program (FEP), or the Combat Arms equivalent remedial program.

k. Echelon 3 commands must:

(1) Appoint a collateral duty Physical Readiness Control Officer (PRCO) to liaison with OPNAV and aid subordinate commands on PRP policies and compliance.

(2) Ensure the PRCO conducts PFA and CFA compliance inspections on subordinate commands and units as required.

(3) Ensure subordinate commands are in compliance with PFA and CFA requirements outlined in this instruction within 60 days of cycle completion.

1. PRCO must:

(1) Be paygrade E-7 through E-9, rank W-3 through W-5, rank O-3 or senior, or civilian GS-9 or above.

(2) Meet CFL PFA standards, if military.

(3) Liaise with the PRP Office.

(4) Conduct Immediate Superior in Command (ISIC) inspections on subordinate commands as necessary, and ensure inspections are performed as per this instruction. For further details, consult the supplemental PRP Guide-11 (PRCO).

(5) Advise echelon 3 commanders regarding final approving authority for subordinate commands submitting requests to waive entire command for one BCA, or to waive more than two consecutive PRTs and CFTs due to Deployment and Operational requirements.

m. Command Physical Readiness Team. Team consists of the command triad (CO, Executive Officer, and Command Master Chief), CFL, and Service members. The combined team is equally responsible and accountable for adhering to Navy's physical fitness standards. This is a team effort requiring due diligence from the entire team to meet the intent of the PRP policy and procedures.

(1) Commanders, COs, OICs will:

(a) Comply with, and execute, all requirements of this instruction using the PRP Guides and PRP website for additional guidance on the program.

(b) Create and maintain a command environment promoting nutrient dense options.

(c) Integrate PT into every workday, consistent with mission and operational requirements.

(d) Assess all Service members reporting via PCS or RC activation (i.e. Active-duty for Operational Support and Mobilization in excess of 6 months via BCA within 5 working days of reporting. Adverse administrative action will not be taken, but non-compliance with BCA standards will result in enrollment in command's FEP (or the Combat Arms equivalent remedial program).

(e) Assess command physical readiness via BCA spot-checks and unofficial (mock) PFAs and CFAs (BCA, PRT and CFT) at their discretion, anytime outside the command PFA or CFA cycle to ensure command personnel are meeting physical readiness requirements as outlined in this instruction. BCA spot-checks can be conducted randomly to help identify at-risk Sailors early and allow them to be placed in FEP (or the combat arms equivalent remedial program) to improve their health and mitigate the risk of PFA or CFA failure. Additional FEP guidance can be found in the supplemental PRP Guide-9 (Command PT and FEP).

(f) Ensure CFLs complete the CFL certification course and are designated in writing prior to assuming the duties as CFL. Maintain one certified CFL to administer the requirements of this instruction and at least one Assistant CFL (ACFL) per 25 command Service members.

(g) Service Equivalent CFL. Ensure Service Equivalent CFLs are qualified. Service Equivalent CFLs are defined as personnel who have completed the Marine Corps Force Fitness Instructor Course, Army Master Fitness Trainer Course or identified as Air Force Physical Training Leader.

(h) Develop awards or incentive programs that encourage Sailors to improve their physical readiness. Subparagraphs 6m(1)(h)1 through 6m(1)(h)3 are some recommended incentives. These recommendations are not all-inclusive and should not limit a commander's creativity in incentivizing and awarding performance.

1. Special Liberty for excellence (i.e., 24-hour liberty for increasing overall score from EXCELLENT to OUTSTANDING).

2. Award certificates for excellence and improvement.

3. Allow members scoring OUTSTANDING to be excluded from command and unit PT until the next official PFA.

(i) Ensure fitness reports and performance evaluations accurately reflect PFA and CFA performance and recommendations for promotions and advancements are conducted per reference (j). Supplemental PRP Guide-1 (PRP Policies) also contains additional information.

(j) Ensure the command has an effective FEP (or the combat arms equivalent remedial program), incorporating nutrition and sleep education as well as physical activity.

(k) Approve or disapprove medical waivers, ensuring waivers are entered into PRIMS prior to a Service member participating in a command PFA and CFA.

(l) Ensure PFA and CFA data is entered into PRIMS within 30 days following the completion of the PFA and CFA cycle.

(m) Ensure a Service member's PRIMS record does not contain a partial PFA or CFA. Members are not authorized to transfer (TRANS) with an incomplete PFA or CFA. Additionally, ensure the member's Unit Identification Code is updated to "TRANS" upon execution of transfer orders to maintain accurate command roster.

(n) Comply with reference (i) reporting requirements for physical readiness-related injuries or fatalities.

(o) Forward Administrative Remarks (Page-13) to the responsible personnel office or Personnel Officer for Navy Standard Integrated Personnel System electronic service record (ESR) verification and submission to the Official Military Personnel File.

(p) Ensure all command PRP documentation for official PFAs, CFAs and FEP (or the combat arms equivalent remedial program) are retained for a period of no less than 5 years. Personal identifiable information (PII) policy will be followed.

(2) CFL must:

(a) Meet and maintain the requirements as described:

1. E-6 or above.

2. Non-user of tobacco and vapor products.

3. Be within BCA standards. The supplemental PRP Guide-3 (Command - Assistant Command Fitness Leader (CFL-ACFL) and Member's Responsibilities)) provides expanded information.

4. Achieve and maintain the PRT score standard for CFLs. The supplemental guide PRP Guide-3 (CFL-ACFL) and Member's Responsibilities) provides expanded information.

5. Maintain current cardiopulmonary resuscitation (CPR) qualifications.

6. Complete CFL certification course (within the last 5 years), prior to assuming duties as CFL.

7. For CFL recertification, successfully complete the CFL certification course or the CFL Seminar every 5 years.

(b) Conduct the PFA and CFA, as outlined in this instruction and the PRP Guides:

1. CFLs must use the BCA Score Sheet as the only approved means of collecting BCA data.

2. CFLs must use the official PRT Score Sheet or the official CFT Score Sheet as the only approved means of collecting PRT and CFT data.

3. Official BCA, PRT, and CFT Score Sheets are located on the PRP website and available for download.

(c) Be a member of the Command Resilience Team and advise command leadership on PRP matters quarterly.

(d) Maintain responsibility and oversight for command PT and FEP (or the combat arms equivalent remedial program).

(e) Ensure ACFLs are designated in writing by the CO and meet the same PFA requirements as CFLs, with the exception of the certification course and paygrade requirements.

(f) Ensure ACFLs are properly trained to conduct BCA measurements, PRTs, CFTs (if necessary), FEP (or the combat arms equivalent remedial program), and command PT sessions. Local training must be documented with ACFL acknowledgement.

(g) Use PRIMS to manage PFA and CFA data. Additional guidance is available in the supplemental guide PRP Guide-7 (PRIMS Administration).

(h) Retain original written documentation (BCA, PRT and CFT Score Sheets, Page-13s, Letter of Notifications, etc.) of official PFA, CFA and FEP (or the combat arms equivalent remedial program) for a period not less than 5 years. PII policy will be followed.

1. Ensure observers and participants sign the official BCA score sheet following completion of the BCA.

2. Ensure observers and participants sign the official PRT score sheet following completion of the PRT modalities. Ensure observers and participants sign the official CFT score sheet following completion of the CFT modalities.

(i) Report all PRP related injuries to the Command Safety Officer.

(j) Draft Letters of Correction for the CO's endorsement and forwarding, along with supporting documentation, to OPNAV for PRIMS correction within 5 years of error.

(3) Service members will:

(a) Participate in a year-round physical fitness program to meet PFA and CFA standards to include incorporating PT as a standard part of every workday.

(b) Maintain a current annual PHA and, if required, complete DRHA or Post-deployment Health Assessment prior to participating in command or unit PT, PRT, CFT, and FEP (or the combat arms equivalent remedial program).

(c) Accurately complete a PARFQ during each PFA and CFA cycle. Print, sign, and report to medical for clearance as indicated on PARFQ responses. A PARFQ is not required if the PRT or CFT will not be conducted (Deployment and Operational , pregnant, etc.)

(d) Address potential medical circumstances affecting participation in the PFA or CFA. This should be done prior to the official command PFA or CFA by obtaining an approved medical waiver endorsed by the CO.

(e) Be responsible for scheduling and participating in a PFA or CFA each cycle, regardless of PCS and TAD status.

(f) If geographically separated, make every attempt to locate a command with a CFL in the same area to conduct the official PFA or CFA when a CFL is not assigned to the member's command.

(g) Verify PRIMS within 60 days following the command PFA and CFA.

(h) Know and understand the passing requirements of the PRP.

(i) Comply with FEP (or the combat arms equivalent remedial program) requirements, if assigned.

7. Records Management

a. Records created as a result of this instruction, regardless of format or media, must be maintained and dispositioned per the records disposition schedules found on Directives and Records Management Division portal page at <https://portal.secnave.navy.mil/orgs/DUSNM/DONAA/DRM/Records-and-Information-Management/Approved%20Record%20Schedules/Forms/AllItems.aspx>.

b. For questions concerning the management of records related to this instruction or the records disposition schedules, please contact the local records manager or the OPNAV Records Management Program (DNS-16).

8. Review and Effective Date. Per OPNAVINST 5215.17A, OPNAV N171 will review this instruction annually around the anniversary of its issuance date to ensure applicability, currency, and consistency with Federal, DoW, Secretary of the Navy, and Navy policy and statutory authority using OPNAV 5215/40 Review of Instruction. This instruction will be in effect for 10 years, unless revised or cancelled in the interim, and will be reissued by the 10-year anniversary date if it is still required, unless it meets one of the exceptions in OPNAVINST 5215.17A, paragraph 9. Otherwise, if the instruction is no longer required, it will be processed for cancellation as soon as the need for cancellation is known following the guidance in OPNAV Manual 5215.1 of May 2016.

9. Forms or Information Management Control

a. Forms. The forms in subparagraphs 9a(1) through 9a(6) are available for download from Naval Forms Online at <https://forms.documentservices.dla.mil/order/>.

(1) NAVPERS 1070/613 Administrative Remarks.

(2) NAVPERS 6110/3 PARFQ.

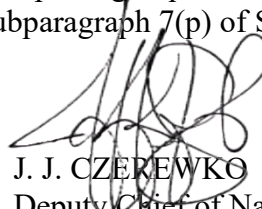

(3) NAVPERS 6110/10 Official BCA Score Sheet.

(4) NAVPERS 6110/11 Official PRT Score Sheet.

(5) NAVPERS 6110/12 Official CFT Score Sheet.

(6) NAVMED 6110/4 Physical Fitness Assessment Medical Clearance or Waiver.

b. Information Management Control. The reporting requirements contained in this instruction are exempt reports under part IV, subparagraph 7(p) of SECNAV Manual 5214.1.

J. J. CZEREWKO
Deputy Chief of Naval Operations
for Personnel, Manpower and Training

Releasability and distribution:

This instruction is cleared for public release and is available electronically only via DON Issuances website, <https://www.secnaveavy.mil/doni/default.aspx>.
