

NAVY BAND FITNESS ENHANCEMENT PROGRAM
AND
WEIGHT MANAGEMENT PROGRAM

The Navy Band's Command Directed Fitness Enhancement Program (FEP) will consist of:

- **An immediate referral to medical.**
- **A Fitness Enhancement and Weight Management routine as outlined by the Command Fitness Leader (CFL).** This routine will be tailored to an individual's deficiency and will consist of, as a minimum, flexibility stretches, sustained aerobic activity, and muscular endurance conditioning. Each session will last a minimum of one hour.
- **Weekly BCA (weigh-ins, and/or taping if necessary) and monthly mock PFA (BCA and PRT) to determine if adequate progress is being met.** For Sailors enrolled in FEP due to BCA concerns, adequate progress as defined in OPNAVINST 6110.J shall be 1-2 pounds per week or 1-2% body fat per month and should not exceed more than 5% of body weight in any week.
- **Monitored exercise sessions 3-4 times week at 0700.** Exercise sessions will be conducted by ACFLs. Members with specific duty conflicts or realistic safety issues (e.g. getting home at 0230 after completing late performance) will arrange an alternative time with the ACFL in order to maintain the mandated three day/week schedule. **Unauthorized absences will be documented as missed jobs/UA using NAVPERS 1616/25-Record of Enlisted Counseling.** Member could also be subject to additional administrative action to include but not limited to lowered evaluation/fitrep grades. FEP sessions scheduled on Holidays or days a member is on leave or assigned light duty by a military medical representative do not have to be made up. FEP sessions missed due to liberty or schedule conflicts will be made up. Members going on tour will coordinate plans for FEP sessions on tour with the FEP Coordinator before departure. FEP will continue during tour preparation days, during tour, and any days of liberty before and after tour.
- **Progress Log.** A log will be maintained on each member's progress and will, at a minimum, include the number of PT evolutions they actively participated in, reasons for any days missed, monthly PFA results, and any special schools and/or training attended (i.e. Ship Shape). Log will be reviewed at each monthly progress meeting by CFL, CMC, and XO.

Consequences of Official Navy PFA Failure

(BCA/PRT Failure as defined by OPNAVINST 6110.J)

First official PFA failure within a 4-year period:

- Member is automatically enrolled in the Fitness Enhancement Program per OPNAVINST 6110.1J.
- Member is assigned performance evaluation grade of 2.0 in "military bearing" for E6 or 2.0 in "professionalism" for E7-E9.
- Member will remain on FEP until successfully completing the next official PFA.

Note: Following successful completion of one PFA as set forth in OPNAVINST 6110.1J, member will undergo a monthly BCA until the next PFA. If FEP member falls out of Navy standards during this period, that person will be reenrolled in monitored FEP three times/week and subject to monthly progress evaluations until the following PFA. If member successfully passes that PFA, the member continues monthly BCAs until the next PFA.

Second official PFA failure within a 4-year period:

- Member is automatically enrolled to the Fitness Enhancement Program per OPNAVINST 6110.1J.
- Member is assigned performance evaluation grade marks of 2.0 in "military bearing" and "initiative" for E6 or 2.0 in "professionalism" and "character" for E7-E9.
- Member will remain on FEP until successfully completing the next official PFA.

Note: Following successful completion of one PFA as set forth in OPNAVINST 6110.1J, member will undergo a monthly BCA until the next PFA. If FEP member falls out of Navy standards during this period, that person will be reenrolled in monitored FEP three times/week and subject to monthly progress evaluations until the following PFA. If member successfully passes that PFA, the member continues monthly BCAs until the next PFA.

Two consecutive official PFA failures, member will remain on Fitness Enhancement Program and will be removed from performance status. If a member is removed from performance status:

- Member will receive written counseling on NAVPERS 1616/25, documenting "Performance" and "Responsibilities" problems. Terms of

regaining performing status will be established as "goals/milestones to be achieved" and will be explained in writing on the counseling form.

- Member will be assigned daily duties during normal working hours and off-duty hours as needed. These duties will normally total about 40 hours per week, including FEP hours.

- Member will return to performance status, once Navy standards have been attained.

Third official PFA failure within a four year period:

- Performance evaluation grade no greater than 1.0 in military bearing for E6 or 1.0 in professionalism for E7-E9

- Promotion Recommendation and Retention Recommendation shall be marked "Significant Problems" and "Retention Not Recommended" respectively

- Mandatory processing for Administrative Separation (ADSEP) per OPNAVINST 6110.1J.

- Additional consequences may be recommended such as lowered grades in other appropriate categories, loss of Promotion Recommendation, denied reenlistment, etc., according to OPNAVINST 6110.1J.

Consequences of Unofficial Failure of BCA

At the discretion of the CO, weigh-ins may be conducted quarterly. Quarterly assessments are not considered official and do not count towards the bi-annual PFA. Quarterly assessments will typically be conducted in late February to early March and in late July to early August. Additionally, the **CO may remove a member from performing status at any time** based on appearance or fitness concerns even if the member is within standards as defined by Navy guidelines.

Components of unofficial BCA:

- Members may be weighed and/or taped at any time if their Unit Leader, Department CIC, CMC, Dept Head, XO, or CO believes that their appearance is substandard.
- **Failure of unofficial BCA will result in assignment to the FEP.** Commanding Officer may enroll members to improve their physical

conditioning per OPNAVINST 6110.1J (Enclosure 2, page 2, paragraph c.)

- Member will receive counseling to define adequate progress expectations. Adequate progress as defined in OPNAVINST 6110.J shall be at least 1-2 pounds per week or 1-2% body fat per month and should not exceed more than 5% of body weight in any week.
- Member will undergo weekly weigh-ins to determine adequate progress.

If member shows adequate progress after one month:

- Member will continue to weigh in weekly until within standards.
- Once the member is within standards, no further weigh-ins are required.

If member does not show adequate progress after one month:

- Member is enrolled in 3x weekly monitored FEP until next official PFA.
- Weigh-ins will be conducted weekly to determine if adequate progress is being met.
- If member passes next official PFA, no further action is required.

Note: If member does not show progress in 3x weekly FEP, monitored sessions move to 4x weekly until next official PFA.

Rewards for positive results of FEP successes:

- Member will receive a letter from the CO of congratulations and encouragement for continued success when they have successfully met Navy standards.
- After two consecutive successful PFAs, member will receive a positive page 13 indicating that the deficiency is corrected.
